INTRODUCTION AND DISTRICT OVERVIEW

AgriBank, FCB ("AgriBank" or "the Bank") and District Associations ("Associations") are part of the customer-owned, nationwide Farm Credit System (System or Farm Credit). The System provides loans, leases and financial services to farmers, ranchers and rural businesses across the United States and Puerto Rico. This focus on rural communities and agriculture is the reason Farm Credit was established in 1916, and the System has been delivering on that mission ever since — helping fund America's food, fuel and fiber and supporting the rural communities America's farmers and ranchers call home.

The System is a cooperative structure. Farm Credit's funds are raised by the Federal Farm Credit Banks Funding Corporation (the Funding Corporation) and insured by the Farm Credit System Insurance Corporation (FCSIC or the Insurance Corporation). The Funding Corporation issues a variety of Federal Farm Credit Banks Combined Systemwide Debt Securities with broad ranges of maturities and structures on behalf of the four System Banks. Each System Bank has exposure to Systemwide credit risk because each Bank is joint and severally liable for all Systemwide debt issued. Farm Credit Associations receive funding through one of the System Banks. System entities have specific lending authorities within their chartered territories and are subject to examination and regulation by an independent federal agency, the Farm Credit Administration (FCA).

Under Farm Credit's cooperative structure, AgriBank is primarily owned by 14 local Farm Credit Associations, which provide financial products and services to rural communities and agriculture. AgriBank obtains funds and provides funding and financial solutions to those Associations. AgriBank and the 14 Associations are collectively referred to as the District. The AgriBank District covers a 15-state area stretching from Wyoming to Ohio and Minnesota to Arkansas.

The following commentary reviews the combined financial condition and results of operations of AgriBank and District Associations and provides additional specific information.

Combined Financial Highlights

AgriBank, FCB and District Associations

(dollars in thousands)

	March 31, 2019	December 31, 2018
Total loans	\$ 108,754,946	\$ 109,081,975

Average assets	127,910,261	121,359,916

MANAGEMENT'S DISCUSSION AND ANALYSIS

Results of Operations

Net income decreased to \$521.5 million for the three months ended March 31, 2019, compared to \$565.5 million for the same period of the prior year. This decrease was primarily driven by decreased non-interest income and increased non-interest expenses. These are partially offset by an increase in net interest income. The decrease in non-interest income was mainly attributable to a lower allocated insurance reserve accounts (AIRAs) refund in March 2019 when compared to March 2018, and to a lesser extent, an increase in mark-to-market losses on economic hedges. The increase in non-interest expenses was due mainly to higher salaries and incentive compensation expenses and occupancy and equipment costs across the District. The increase in net interest income was due mainly to increased loan volume across the District.

Net Interest Income

Net interest income increased \$39.0 million, or 5.2 percent, compared to the same period of the prior year, primarily due to increased loan volume. This increase was partially offset by a decline in the positive contribution from funding actions, as anticipated, due to the current interest rate environment.

Net interest margin was 2.6 percent for the three months ended March 31, 2019, compared to 2.5 percent for the same period of the prior year, as the lending environment remained competitive across the District. The benefit of equity financing substantially offset the impact of spread compression compared to the prior year. Equity financing represents the benefit of non-interest bearing funding and increased compared to the prior year due to higher equity volume and higher interest rates.

Provision for Credit Losses

The provision for credit losses was \$20.0 million for the three months ended March 31, 2019. Any reserves for unfunded commitments and letters of credit are recorded in "Other liabilities" on the Combined Balance Sheets.

The year-over-year fluctuations for the District's provision for credit losses can be impacted by economic stress in individual agricultural sectors. Low net farm income and credit quality deterioration, primarily in the grain and dairy industries, have resulted in additional provision for credit losses during the three months ended March 31, 2019. Prolonged lower levels of net farm income and other economic factors could contribute to further declines in credit quality, which may increase provision for credit losses across the District.

Non-interest Income

The decrease in non-interest income was driven by the decreased AIRAs distribution received from the FCSIC during the first quarter of 2019 compared to the same period of the prior year. The AIRAs were established by the FCSIC when premiums collected increased the level of the insurance fund beyond the required secured base amount of 2 percent of insured debt.

The decrease in mineral income and losses on AgriBank's commodity options related to mineral income were primarily due to decreased oil and gas prices and decreased leasing activity. Mineral income was earned primarily from royalties received on mineral rights, predominantly in the Williston Basin in western North Dakota. The options related to the mineral income increased in value during the fourth quarter of 2018, when oil prices decreased; however, as oil prices rebounded in the first quarter of 2019, the value of the options decreased. These losses are classified as "Other income" on the Combined Statements of Income.

Non-interest Expense

Overall, non-interest expense increased slightly, primarily driven by increased salaries and benefits expense. The increase in salaries and benefits expense was primarily due to an increase in employees in the District, as well as annual merit increases.

Loan Portfolio

District Loans by Loan Type		
	March 31,	December 31,
(in thousands)	2019	2018
Real estate mortgage	\$ 59,586,899	\$59,810,146
Production and intermediate-term	25,599,923	26,888,339
Agribusiness:		
Loans to cooperatives	1,498,020	1,227,755
Processing and marketing	11,427,010	10,552,428
Farm-related businesses	1,253,533	1,288,785
Rural infrastructure:		
Power	1,196,668	1,175,525
Communications	1,815,147	1,761,466
Water/Wastewater	220,521	103,438
Rural residential real estate	2,678,908	2,708,589
Agricultural export finance	318,375	320,434
Lease receivables	205,313	207,450
Loans to other financing institutions	508,262	549,113
Mission related investments	2,446,367	2,488,507
Total	\$ 108,754,946	\$109,081,975

District loans decreased \$327.0 million, or 0.3 percent, from December 31, 2018. The decrease in total loans was primarily due to repayments on production and intermediate-term loans across the District following draws made prior to year-end for tax-planning purposes. The overall decrease in loans was partially offset by growth in the agribusiness sector primarily due to capital markets lending.

The loan portfolio exhibits some seasonality relating to the patterns of operating loans made to crop producers. Operating loans are normally at their lowest levels following the harvest and then increase in the spring and throughout the rest of the year as borrowers fund operating needs. The degree of seasonality exhibited by the loan portfolio is diminished primarily due to growth in real estate mortgage, agribusiness and part-time farmer sectors.

Loan Quality

The primary credit quality indicator utilized by the Bank and Associations is the FCA Uniform Loan Classification System, which categorizes loans into five categories. The categories are defined as follows:

- Acceptable assets are expected to be fully collectible and represent the highest quality.
- Other assets especially mentioned (Special Mention) assets are currently collectible but exhibit some potential weakness.
- Substandard assets exhibit some serious weakness in repayment capacity, equity, and/or collateral pledged on the loan.
- Doubtful assets exhibit similar weaknesses to substandard assets; however, doubtful assets have additional weaknesses in existing factors, conditions and values that make collection in full highly questionable.
- Loss assets are considered uncollectible.

The following table shows loans and related accrued interest classified under the Uniform Loan Classification System as a percentage of total loans and related accrued interest receivable.

District Loan Quality		
	March 31, 2019	December 31, 2018
Acceptable	91.0%	91.1%
Special Mention	3.9%	4.0%
Substandard/Doubtful	5.1%	4.9%
Total	100.0%	100.0%

The credit quality of the District loan portfolio remained sound at March 31, 2019. Substandard/Doubtful loans, collectively called adverse loans, are loans AgriBank and District Associations have identified as showing some credit weakness outside the credit standards. While acceptable loan volume remains strong, loan volume classified in categories other than acceptable have continued to increase as the District adjusts to the current environment. No loans were categorized as loss as of March 31, 2019 or December 31, 2018.

Overall, District credit quality is expected to remain at acceptable levels throughout 2019, despite recent increases in adverse credit quality. Due to continued erosion of the farm sector working capital, low net farm income levels, primarily driven by low commodity prices, and the addition of disruptive trade policy during 2018, the downturn in credit quality has worsened within many sectors of the District's retail portfolio and has impacted retail borrower working capital. Given continued projected low net farm income and the product mix within this retail portfolio, adverse credit quality and related allowance for loan losses and provision for loan losses may continue to increase.

Nonperforming Assets					
	N	1arch 31,	December 31		
(in thousands)		2019	2018		
Nonaccrual Loans:					
Real estate mortgage	\$	462,730	\$	454,787	
Production and intermediate-term		269,514		224,889	
Agribusiness		68,901		60,166	
Rural infrastructure		26,055		27,120	
Rural residential real estate		27,331		28,375	
Other		1,233		1,321	
Total nonaccrual loans	\$	855,764	\$	796,658	
Accruing Restructured Loans:					
Real estate mortgage	\$	58,539	\$	59,329	
Production and intermediate-term		18,130		17,867	
Agribusiness		2,971		3,004	
Rural residential real estate		1,789		1,947	
Total accruing restructured loans	\$	81,429	\$	82,147	
Accruing Loans 90 Days or More Past Due:					
Real estate mortgage	\$	13,491	\$	8,954	
Production and intermediate-term		23,801		5,695	
Agribusiness		766			
Rural residential real estate		712		337	
Other		31,743		27,257	
Total accruing loans 90 days or more past due	\$	70,513	\$	42,243	
Total nonperforming loans		1,007,706		921,048	
Other property owned		43,097		47,267	
Total nonperforming assets	\$	1,050,803	\$	968,315	

Note: Accruing loans include accrued interest receivable.

The Other category is primarily composed of certain assets originated under the Mission Related Investment authority and finance leases.

Increased nonperforming assets have been driven primarily by declines in net farm income levels for certain borrowers within the District. Based on current forecasts for net farm income levels in certain agricultural production sectors, risk assets are expected to continue to rise. Nonperforming assets have primarily been concentrated in the real estate mortgage and production and intermediate-term sectors during the periods presented.

Aging Analysis of Loans

	30-89	90 Days		Not Past Due

Other	53,471	28,162	81,633	3,502,208	3,583,841
	·	-	·	· ,	· ·
Total	\$ 451,436	\$ 264,958	\$ 716,394	\$ 109,680,814	\$ 110,397,208

Note: Accruing loans include accrued interest receivable.

The Other category is composed of certain assets originated under the Mission Related Investment authority, loans to other financing institutions, agricultural export finance leases.

Past due loans have increased and are reflective of the overall credit quality in the portfolio. Additionally, delinquencies tend to exhibit some seasonality as many loans within the portfolio mature or have annual payments due during the first quarter of the year.

^{*} Represents reclassifications between the allowance for loan losses and the reserve for unfunded commitments as a result of advances on or repayments of seasonal lines of credit or other loans.

Investments

To maintain alignment with new FCA regulations effective January 1, 2019, certain financial instruments held by one District Association were reclassified from "Investment securities" to "Loans" in the Combined Statements of Condition. This reclassification was applied to December 31, 2018 balances to conform to this revised presentation resulting in investments decreasing by \$1.4 billion and loans increasing by the same amount.

AgriBank is responsible for meeting the District's funding, liquidity and asset/liability management needs. While access to the unsecured debt capital markets remains the District's primary source of liquidity, the Bank also maintains a secondary source of liquidity through a high-quality investment portfolio and other short-term liquid assets. The Bank typically holds these investments on an available-for-sale basis. Refer to the AgriBank 2018 Annual Report for additional information about the Bank's investment portfolio. District Associations have regulatory authority to enter into certain guaranteed investments, typically mortgage-backed or asset-backed securities, and are typically held to maturity. Refer to individual District Associations' 2018 annual reports for specific information about the investments at the District Associations.

District Capital

AgriBank and District Associations believe a sound capital position is critical to long-term financial stability. AgriBank and District Associations maintain adequate capital to protect against unanticipated losses as well as to meet the District's growth needs. Total shareholders' equity increased \$418.8 million, primarily resulting from net income for the three months ended March 31, 2019, partially offset by patronage distributions declared.

Accumulated Other Comprehensive Loss				
(in thousands)	r	March 31, 2019	De	cember 31, 2018
Unrealized loss on investment securities	\$	(42,744)	\$	(82,857)
Derivatives and hedging activity		(8,132)		34,005
Employee benefit plans activity		(465,217)		(473,623)
Total accumulated other comprehensive loss	\$	(516,093)	\$	(522,475)

The improvement in accumulated other comprehensive loss (AOCL) in 2019 primarily relates to decreased unrealized losses on investment securities. Investment securities held by AgriBank and District Associations are primarily debt securities that increase in value as interest rates fall. Due to decreasing interest rates during the first quarter of 2019, the fair value of certain investment securities increased correspondingly. Additionally, the decrease in AOCL was significantly offset by increased unrealized losses on pay fixed derivative instruments that decrease in value when interest rates fall.

The Farm Credit Administration sets minimum regulatory capital requirements for Banks and Associations.

Regulatory Capital Requirements and Ra	tios				
	Primary Components of	Regulatory	Minimum		
As of March 31, 2019	Numerator	Minimums	with Buffer*	Bank	District Associations

^{*} The 2.5% capital conservation buffer over risk-adjusted ratio minimums is being phased in over three years under the FCA capital requirements. The phase in period ends on December 31, 2019.

⁽¹⁾ Equities outstanding 7 or more years

⁽²⁾ Capped at 1.25% of risk-adjusted assets

Outstanding 5 or more years, but less than 7 years

⁽⁴⁾ Outstanding 5 or more years

Other Matters

During 2016, District Associations and AgriBank conducted research related to repositioning many business services offered by AgriBank into a separate entity jointly owned by AgriBank and participating Associations. The long-term strategic objective of this initiative is to increase scale, improve operating efficiency, and enhance technology and business services. The proposed service entity will be named SunStream Business Services (SunStream). An application to form the service entity was submitted to the FCA for approval in May 2017, and the FCA continues its due diligence on this request.
