AGRIBANK 2022 QUARTERLY REPORT
JUNE 30, 2022

THRIVING

today and tomorrow

AgriBank
FARM CREDIT BANK

Copies of Quarterly and Annual Reports are available upon request by contacting AgriBank, FCB, 30 E. 7th Street, Suite 1600, St. Paul, MN 55101 or by calling (651) 282-8800. Reports are also available at www.AgriBank.com.

Management's Discussion and Analysis

AgriBank, FCB

(Unaudited)

The following commentary is a review of the financial condition and results of operations of AgriBank, FCB (AgriBank, or the Bank). This information should be read in conjunction with the accompanying Financial Statements, the Notes to the Financial Statements and the 2021 Annual Report.

AgriBank is part of the customer-owned, nationwide Farm Credit System. Under Farm Credit's cooperative structure, AgriBank is primarily owned by Farm Credit Associations, which provide financial products and services to rural communities and agriculture. AgriBank obtains funds and provides funding and financial solutions to those Associations. AgriBank and those Associations comprise the AgriBank District. The AgriBank District covers a 15-state area stretching from Wyoming to Ohio and Minnesota to Arkansas.

Forward-Looking Information

Any forward-looking statements in this Quarterly Report are based on current expectations and are subject to uncertainty and changes in circumstances. Actual results may differ materially from expectations due to a number of risks and uncertainties. More information about these risks and uncertainties is contained in our 2021 Annual Report. AgriBank undertakes no duty to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Financial Overview

Net income remained strong as our year-to-date return on assets (ROA) ratio of 51 basis points was above our target of 50 basis points. Net interest income increased compared to the prior year primarily due to increases in loan volume. Offsetting the increase in net interest income, non-interest income declined, primarily driven by lower loan prepayment and conversion activity than observed in 2021 due to higher interest rates year-over-year.

Loan portfolio credit quality remained strong with 99.5 percent of our total loan portfolio in the acceptable category, which reflects the overall financial strength of District Associations and their underlying portfolios of retail loans. Credit quality of our retail loan portfolio (accounting for approximately 12 percent of our total loan portfolio) improved slightly to 95.6 percent acceptable as of June 30, 2022, compared to 95.4 percent acceptable at December 31, 2021. See the Loan Portfolio section for additional discussion about how other factors may impact our loan portfolio performance.

Strong capital levels ensure we are well-positioned to manage the cyclical characteristic of the agricultural market, as well as the challenges and uncertainty of the overall economic environment. Refer to the Loan Portfolio and Funding, Liquidity and Shareholders' Equity sections for further discussion.

Economic Conditions

Interest Rate Environment

U.S. economic activity is slowing due to supply chain constraints, monetary actions by the Federal Open Market Committee (FOMC) of the Federal Reserve and the market impacts of the Russian invasion of Ukraine. U.S. gross domestic product is forecasted to grow by approximately 2.0 percent in 2022, as both consumer and investment spending continue to rebound. The unemployment rate has declined below 4.0 percent and is expected to remain low with the current high number of job openings. Consumer price inflation has been elevated due to imbalances between supply and demand as the economy has reopened. The Federal Reserve has stated that the elevated rate of inflation will recede, though at a much slower pace than the Federal Reserve originally expected.

The FOMC is removing monetary accommodation in 2022 due to the high price inflation rate. The FOMC raised the federal funds rate to a target range of 2.25 to 2.50 percent at its July 2022 meeting. The FOMC began to reduce the size of its balance sheet in June 2022, and its projection for interest rates suggests that it will raise the fed funds target rate to over 3.25 percent by the end of

2022. As of the end of July, the fed funds futures market suggested the FOMC will increase the fed funds rate to 3.25 percent by the end of 2022.

With a higher likelihood of further interest rate hikes in 2022, U.S. Treasury yields have moved higher in the first part of 2022. Economists expect the U.S. Treasury bond yield curve to remain relatively flat as the FOMC continues to raise the fed funds target rate.

We manage interest rate risk consistent with policies established by the board of directors and limits established by AgriBank's Asset/Liability Committee (ALCO). While many factors can impact our net interest income, management expects that financial performance will remain relatively consistent under most interest rate environments over the next 12 months.

Agricultural Conditions

The U.S. Department of Agriculture's Economic Research Service (USDA-ERS) released its initial forecast of the U.S. aggregate farm income and financial conditions for 2022 on February 4, 2022 using price and production forecasts from the January 2022 World Agricultural Supply and Demand Estimates (WASDE) report. The initial forecast put 2022 net farm income (NFI) down $5.4 billion, or 4.5 percent, from the $119.1 billion 2021 NFI forecast. If realized at $113.7 billion, the 2022 NFI projection would be the third highest level ever in nominal dollars, trailing only 2021 and 2013. The lower 2022 NFI forecast is largely driven by an expected $15.4 billion, or 56.8 percent, decline in direct government payments paired with a $20.1 billion, or 5.1 percent, increase in total production expenses. These two factors more than offset the $29.3 billion forecasted increase in cash receipts from crop and animal/animal product sales. Rapidly evolving market conditions and geopolitical events since the February 2022 USDA-ERS forecast release will likely result in significant revisions to the USDA-ERS farm finance forecasts in its September 1, 2022 forecast update.

Commodity prices remain elevated and volatile in mid-2022. Supply chain issues, continuing COVID-19 outbreaks, labor and transportation constraints, high input costs, South American production issues and the Russian invasion of Ukraine have compounded global supply uncertainties. Further, high inflation and corresponding Federal Reserve Bank interest rate hikes have elevated concerns over a potential recession that could reduce demand for commodities. U.S. crop prices firmed through the spring of 2022 as slow U.S. planting progress and restricted supplies from the Black Sea region increased speculative fund buying interest in U.S. crop futures. Crop futures began to retreat in mid-June 2022 as recession expectations increased, the U.S. dollar strengthened to 20-year highs and concerns over 2022 U.S. crop production eased. Crop prices are expected to remain volatile into the fall of 2022, as weather will play an important role during critical crop development phases, while new events in Ukraine could also impact crop prices. The June 2022 USDA Acreage report showed that American farmers planted 3.4 million fewer corn acres in 2022 compared to 2021 , in line with expectations, while 2022 soybean acreage was estimated to increase just over one million acres, which was more than two million acres below the average market expectation. Cold and wet weather during the planting season reduced plantings in North Dakota and Minnesota. Despite U.S. crop prices retreating from spring highs, most crop farmers should experience positive returns if crop prices hold near mid-July 2022 levels (or higher) and production runs near trend-line levels. High crop insurance price guarantees established in February 2022 should provide support for those producers that experience production issues in 2022.

High crop prices present a challenge for livestock, dairy and poultry industries, where feed is the highest variable expense for operations. The animal agriculture sector has been resilient in the high feed cost environment due to several factors, including solid demand and restrained production. Cost-plus contracts, which are most prevalent in the poultry sector, have also helped operations that have those contracts in place. Disease pressure has reduced animal numbers in the poultry and hog sectors, providing support for meat and egg prices. Highly pathogenic avian influenza (bird flu) appeared in U.S. migratory bird flyways in early 2022, which was the first significant U.S. outbreak since 2015. The majority of outbreaks to date have occurred in layer flocks, which has tightened supplies and supported high egg prices. Hog farms have coped with a respiratory disease that has kept the hog herd smaller than expected and has been supportive for hog prices. The U.S. dairy market experienced significant herd contraction the second half of 2021 following the poor margins earlier in 2021. Falling international milk production and solid demand supported a return of favorable U.S. dairy margins in late 2021 and early 2022. Positive dairy margins are expected to continue into early 2023. Beef feedlots are facing the most pressure across the animal agriculture sector in 2022. Poor pasture conditions in the western U.S. paired with high corn prices have prompted the contraction of the cattle herd. The historically high amount of cattle in feedlots in early 2022 has been negative for cattle prices. The cattle market is expected to be in better balance later in the year, but high corn prices throughout the summer are expected to challenge cattle feeding margins for the balance of 2022.

Despite all the challenges and uncertainty in markets the past few years, the U.S. agriculture sector is positioned well in 2022, and farm balance sheets are generally strong. Many factors, including weather, trade, government policy, global agricultural production levels, and pathogenic outbreaks in livestock and poultry, may keep agriculture market volatility elevated for the next 12 months. Implementation of cost-saving technologies, marketing methods and risk management strategies will continue to cause a wide range of results among the respective agricultural producers.

Land Values

The AgriBank District continues to monitor agricultural land values. We conduct an annual Benchmark Survey, completed by licensed real estate appraisers, on representative benchmark farms in 33 regions of the District. The District's most recent real estate market value survey, based on the 12-month period ending June 30, 2021, indicated that District real estate value changes in the regions ranged from a negative 0.7 percent to a positive 23.4 percent with 32 of the 33 regions experiencing increases. There continues to be ample demand from farmers and ranchers, as well as interest from investors, providing support for land prices. Land values in the District should see continued increases over the next year due to strong net farm income, real estate demand outpacing land available for sale, continued low (albeit rising) interest rates, and stock market volatility.

The Federal Reserve Banks of Chicago, Kansas City and Minneapolis reported on the change in farmland values from the end of the first quarter 2021 to the end of the first quarter 2022 in their respective districts. The Federal Reserve district reports indicated increases in non-irrigated farmland values ranging from 23 to 24 percent.

The USDA land value survey, which is conducted annually using June values and published in August of each year, is based on a survey of agricultural producers across the United States. Results of the 2021 survey showed increases of 6.6 percent for overall farm real estate values and 7.6 percent for cropland values specific to the AgriBank District.

AgriBank District credit risk policies focus on loan repayment capacity in addition to conservative loan-to-value levels on the collateral that secures loans. Although FCA regulations allow real estate mortgage loans of up to 85 percent of appraised value, AgriBank's underwriting guidance generally limits lending to no more than 65 percent at origination. With increased land values across the District, Associations continue to analyze credit using sustainable repayment capacity and/or utilize lending caps per acre based on the land's long-term income-producing capacity. These proactive lending practices reduce the impact on District loan portfolios if land values materially decline.

Loan Portfolio

Components of Loans

(in thousands)	**June 30, 2022**	December 31, 2021
Accrual loans:		
Wholesale loans	**$110,071,170**	$108,166,365
Retail loans:		
Real estate mortgage	**4,754,864**	4,357,270
Production and intermediate-term	**8,131,281**	7,644,823
Loans to other financing institutions (OFIs)	**759,718**	703,471
Other	**1,264,034**	1,070,843
Total retail loans	**14,909,897**	13,776,407
Nonaccrual loans	**48,387**	51,340
Total loans	**$125,029,454**	$121,994,112

The Other category was primarily composed of agribusiness and rural residential real estate loans.

Loans totaled $125.0 billion at June 30, 2022, an increase of $3.0 billion from December 31, 2021. Within total loans, growth in wholesale loans was primarily driven by a rise in agribusiness and real estate mortgage volume throughout the AgriBank District, partially offset by declines in production and intermediate-term volume. Agribusiness volume increases were related to growth in capital markets lending at several District Associations, specifically in the grain sector, during the first half of 2022. These increases were partially offset by seasonal repayments of operating lines in the second quarter, which were larger and came later than normal following the spring commodity price run-ups. Additionally, real estate mortgage volume increased at District Associations due to continued demand for lower fixed rates in the first quarter of 2022, prior to the quickly rising rates in the second quarter. Offsetting these increases, production and intermediate-term volume decreased related to seasonal tax-planning growth in December, followed by repayments in January. Higher grain prices have also increased the repayments of many operating loans from the extra cash flow across District Associations.

Retail loans increased, driven by growth in production and intermediate-term and real estate mortgage loans, primarily related to the loans purchased within several pool programs in the first half of 2022. These increases were partially offset by seasonal paydowns.

Overall, credit quality remains strong, primarily supported by commodity prices. As a majority of our loans are wholesale loans, we expect our credit quality will remain strong even as some District Associations may experience declines in their retail credit quality in the future. Each District Association has allowances for loan losses, earnings and capital that absorb their credit losses before their losses would impact our wholesale loans.

The credit quality of our total loan portfolio remained strong at 99.5 percent in the acceptable category at June 30, 2022, compared to 98.3 percent at December 31, 2021. As of June 30, 2022, all outstanding wholesale loans were classified as acceptable. Adversely classified loans were 0.2 percent at June 30, 2022, compared to 0.3 percent at December 31, 2021. Credit quality of our retail loan portfolio increased slightly to 95.6 percent acceptable as of June 30, 2022, compared to 95.4 percent acceptable at December 31, 2021. While credit quality is currently strong, many factors could impact borrowers and may result in changes to credit quality in our loan portfolio.

Components of Risk Assets

(in thousands)	**June 30, 2022**	December 31, 2021
Nonaccrual loans	**$48,387**	$51,340
Accruing restructured loans	**3,243**	3,424
Accruing loans 90 days or more past due	**13,313**	2,531
Total risk loans	**64,943**	57,295
Other property owned	**95**	1,126
Total risk assets	**$65,038**	$58,421
As a percent of retail loans		
Risk loans	**0.43 %**	0.41 %
Nonaccrual loans	**0.32 %**	0.37 %
Delinquencies	**0.42 %**	0.43 %
As a percent of loans		
Risk loans	**0.05 %**	0.05 %
Nonaccrual loans	**0.04 %**	0.04 %
Delinquencies	**0.05 %**	0.05 %

Note: Accruing loans include accrued interest receivable.

Risk assets remain at acceptable levels, and total risk loans as a percentage of total loans remains within our established risk management guidelines. Risk loans were primarily concentrated in the production and intermediate-term and real estate mortgage sectors, including loans in our equipment financing portfolio, crop input financing portfolio and other asset pools. At June 30, 2022, 75.7 percent of nonaccrual loans were current as to principal and interest.

The seasonality of our crop input financing portfolio was the primary driver of the increase in risk loans within accruing loans 90 days or more past due category. The risk in the crop input financing portfolio is significantly mitigated by credit enhancements, including guarantees with third parties that are in a strong financial position. Our accounting policy requires loans past due 90 days to be transferred into nonaccrual status unless adequately secured and in the process of collection. Based on our analysis, all accruing loans 90 days or more past due were eligible to remain in accruing status.

Allowance Coverage Ratios

	June 30, 2022	December 31, 2021
Allowance as a percentage of:		
Loans	**0.03 %**	0.03 %
Retail loans	**0.22 %**	0.27 %
Nonaccrual loans	**67.93 %**	73.16 %
Total risk loans	**50.61 %**	65.55 %
Adverse assets to capital and allowance for loan losses	**4.51 %**	4.64 %

The allowance for loan losses is an estimate of losses on loans in our portfolio as of the financial statement date. We determine the appropriate level of allowance for loan losses based on the periodic evaluation of factors such as loan loss history, estimated probability of default, estimated loss severity, portfolio quality, and current economic and environmental conditions. As of June 30, 2022, the allowance decreased $4.7 million, compared to December 31, 2021. This decrease was primarily related to continued strong credit quality. However, volatile commodity prices and potential continued high input costs may impact allowance for loan losses in the future.

Funding, Liquidity and Shareholders' Equity

We are responsible for meeting the District's funding, liquidity and asset/liability management needs. Access to the unsecured debt capital markets remains our primary source of liquidity. We also maintain a secondary source of liquidity through a high-quality investment portfolio and other short-term liquid assets.

The System access to the debt capital markets is critical to support its mission of providing credit to farmers, ranchers and other eligible borrowers. For the six months ended June 30, 2022, investor demand for Systemwide Debt Securities remained favorable.

Our liquidity policy and FCA regulations require maintaining minimum liquidity on a continuous basis of 120 days and 90 days, respectively. The days of liquidity measurement refers to the number of days that maturing debt is covered by liquid investments and cash. As of June 30, 2022, we had sufficient liquidity to fund all debt maturing within 152 days. At June 30, 2022, we held qualifying assets in excess of each incremental level to meet the liquidity coverage intervals. Due to macroeconomic events including, but not limited to, military actions and political instability abroad, volatility in liquidity coverage is expected; therefore, the level of days coverage liquidity may rise and fall over the year.

We manage interest rate risk under policies established by our board and limits established by our ALCO. These policies and limits ensure that net interest income and economic value of equity at risk remain within the defined risk appetite of the board, including during periods of high interest rate volatility.

Total shareholders' equity at June 30, 2022 was $6.8 billion, a $225.8 million decrease from December 31, 2021. While net income and net stock issuances positively impacted shareholders' equity, these increases were more than offset by unrealized investment losses, primarily on U.S. treasuries and fixed-rate U.S. government guaranteed mortgage-backed securities, related to the rapid increase in interest rates through the first half of 2022. The unrealized investment losses do not represent a deterioration in the quality of the investment portfolio and, based on our analysis, no investments are other than temporarily impaired at this time.

At June 30, 2022, we exceeded the regulatory minimum capital ratios. Refer to the Additional Regulatory Information section as well as Note 4 in the accompanying Financial Statements for further discussion of capital ratios.

Results of Operations

Net income for the six months ended June 30, 2022 was $365.7 million, a 0.1 percent increase, compared to $365.2 million for the same period in 2021. ROA of 51 basis points through the six months ended June 30, 2022 remained above AgriBank's 50 basis point target.

Changes in Significant Components of Net Income

(in thousands) **For the six months ended June 30,**	**2022**	2021	Increase (decrease) in Net Income
Net interest income	**$398,848**	$366,245	$32,603
Reversal of credit losses	**(5,000)**	(2,000)	3,000
Non-interest income	**52,480**	74,470	(21,990)
Non-interest expense	**90,648**	77,519	(13,129)
Net income	**$365,680**	$365,196	$484

Investment securities and federal funds	**19,986,071**	**0.75 %**	**73,882**	19,109,542	0.61 %	58,164
Total earning assets	**143,216,930**	**1.59 %**	**1,130,037**	130,229,991	1.49 %	962,610
Interest bearing liabilities	**136,846,866**	**1.08 %**	**731,189**	124,371,127	0.97 %	596,365
Interest rate spread	**$6,370,064**	**0.51 %**		$5,858,864	0.52 %	
Impact of equity financing		**0.05 %**			0.05 %	
Net interest margin		**0.56 %**			0.57 %	
Net interest income			**$398,848**			$366,245

Net interest income increased mainly due to higher loan volume, compared to the prior year. Growth in our retail portfolio, specifically in our asset pools, equipment financing and crop input financing portfolios, was the most significant driver of net interest income increases.

Net interest margin for the six months ended June 30, 2022 decreased slightly compared to the same period of the prior year. With interest rates rising rapidly through 2022, opportunities to refinance debt in a more efficient manner than the loan portfolio have diminished. Offsetting this, net interest margin was positively impacted by improved spreads on investments from the significant rise in interest rates throughout 2022. While comparable to the prior year, the impact of equity financing has started to improve slightly. Equity financing represents the benefit of non-interest bearing funding.

Non-interest income

There was a significant decrease in non-interest income for the six months ended June 30, 2022, compared to the same period of the prior year. As interest rates have risen, fixed-rate loan prepayment and conversion activity has slowed significantly and returned to levels common in a rising interest rate environment. Mineral income increased for the six months ended June 30, 2022 compared to the same period of the prior year, primarily due to a significant increase in oil prices in 2022. The ongoing conflict in Ukraine has caused prices to increase and remain at levels not seen for the last nine years. Despite higher prices, production continues to lag behind the increase in demand.

Non-interest expense

Non-interest expense increased for the six months ended June 30, 2022 compared to the same period of the prior year. Loan servicing fees grew, related to the purchase of loans in several pool programs as well as growth within our equipment financing portfolio compared to the same period of the prior year. In June 2022, the Farm Credit System Insurance Corporation announced an increase in premium rates for all Farm Credit institutions from 16 basis points to 20 basis points, effective retroactively to January 1, 2022. This increase had an impact of $2.8 million additional expense during the second quarter of 2022.

LIBOR Transition

ICE Benchmark Administration (the entity responsible for calculating LIBOR) ceased the publication of the one-week and two-month USD LIBOR settings immediately following the LIBOR publication on December 31, 2021, and has announced it intends to cease publication of the remaining USD LIBOR settings immediately following the LIBOR publication on June 30, 2023. We have exposure to LIBOR, including financial instruments that reference LIBOR, that mature after 2021 and June 2023. As such, developments in the discontinuation and replacement of LIBOR, including, but not limited to, changes to applicable laws, could have a material impact on us, District Associations, other Farm Credit institutions, borrowers, investors and counterparties. Refer to the AgriBank 2021 Annual Report for further information regarding the cessation of LIBOR and our risk mitigation efforts as a result of this change.

LIBOR-Indexed Variable Rate Financial Instruments

(in thousands)

As of June 30, 2022

Year of Maturity	2022	January 1 - June 30, 2023	July 1, 2023 and After	Total
Assets				
Loans	$13,530	$6,400	$190,022	$209,952
Investments	1	19	1,166,540	1,166,560
Total	$13,531	$6,419	$1,356,562	$1,376,512
Shareholders' equity				
Preferred stock[1]	$—	$—	$250,000	$250,000

[1]The preferred stock is redeemable in whole or in part, at our option, quarterly beginning January 1, 2024. Dividends accrue at a fixed annual rate of 6.875 percent from the date of issuance through December 31, 2023, and beginning January 1, 2024 will accrue at an annual rate equal to three-month United States Dollar LIBOR rate, reset quarterly, plus 4.225 percent.

(in millions)

Year of Termination	2022	January 1 - June 30, 2023	July 1, 2023 and After	Total
Derivatives (notional amount)	$250	$650	$1,088	$1,988

As advantageous opportunities arise, AgriBank has been terminating certain LIBOR-indexed swaps. These terminations are intended to opportunistically lower AgriBank's exposure to LIBOR instruments due to the LIBOR discontinuance.

Our exposure to loans indexed to LIBOR does not include wholesale loans, as they are not directly indexed to LIBOR. However, the wholesale pricing terms are generally matched to the District Associations' retail portfolios, which contain loans indexed to LIBOR. As such, the wholesale loans have historically been partially funded by LIBOR-indexed bonds. LIBOR-indexed bonds were also used to fund a portion of our administered variable loans to District Associations and, in turn, their customers. As we have shifted our funding, with no remaining LIBOR-indexed bonds as of the year-ended 2021, certain District Associations may see their basis risk increase. With limited exceptions in accordance to FCA guidance, District Associations have ceased issuing new loans indexed to LIBOR, somewhat mitigating this basis risk.

Other Matters

Our approval is required for significant structural changes at District Associations, including, but not limited to, merger, acquisition, liquidation or re-affiliation to another Farm Credit District.

On June 24, 2022, the boards of directors of Farm Credit Midsouth, ACA and Farm Credit Mid-America, ACA executed a letter of intent to merge the two associations. The merged association would be named Farm Credit Mid-America, ACA and headquartered in Louisville, Kentucky. Both associations are undertaking due diligence to assess merger benefits. If the outcome of due diligence is satisfactory and related approvals are received from both boards, AgriBank and the Farm Credit Administration (FCA), customer-owners would vote on the merger in early 2023. If approved, the target effective date for the merger is April 1, 2023.

In 2021, Delta, ACA's (Delta's) board of directors determined that it was in the best interests of Delta to voluntarily dissolve, and approved a preliminary resolution to proceed with a plan to voluntarily liquidate and dissolve the Association (the Plan). On March 17, 2022, the FCA preliminarily approved the Plan. On April 14, 2022, Delta's stockholders approved the Plan, which includes an agreement to sell the loan portfolio to another District Association. Subsequently, on April 19, 2022, the FCA provided final approval of the Plan. The sale of Delta's entire loan portfolio to AgHeritage Farm Credit Services, ACA occurred on May 1, 2022. All employees were terminated effective May 31, 2022. The assets are under the control of a liquidation agent, and the ultimate timing of the final liquidation is uncertain and subject to multiple considerations.

Certification

The undersigned have reviewed the June 30, 2022 Quarterly Report of AgriBank, FCB, which has been prepared under the oversight of the Audit Committee and in accordance with all applicable statutory or regulatory requirements. The information contained herein is true, accurate and complete to the best of our knowledge and belief.

Notes to Financial Statements

AgriBank, FCB

(Unaudited)

NOTE 1

Organization and Significant Accounting Policies

AgriBank, FCB (AgriBank) is one of the Banks of the Farm Credit System (the System), a nationwide network of cooperatively owned Banks and Associations, established by Congress and subject to the provisions of the Farm Credit Act of 1971, as amended. The System specializes in providing financing and related services to qualified borrowers for agricultural and rural purposes. AgriBank and its District Associations are collectively referred to as the District. As of June 30, 2022, the District had 13 Agricultural Credit Associations (ACAs). Each parent ACA has wholly owned Federal Land Credit Association and Production Credit Association subsidiaries. AgriBank serves as the intermediary between the financial markets and the retail lending activities of the District Associations.

A description of our organization and operations, significant accounting policies followed, financial condition and results of operations as of and for the year ended December 31, 2021 are contained in the 2021 Annual Report. There have been no changes in our accounting policies since December 31, 2021. These unaudited second quarter 2022 Financial Statements should be read in conjunction with the 2021 Annual Report. The results for the six months ended June 30, 2022 do not necessarily indicate the results to be expected for the year ending December 31, 2022.

The accompanying Financial Statements contain all adjustments necessary for a fair presentation of the interim financial condition and results of operations and conform to generally accepted accounting principles in the United States of America (GAAP) and prevailing practices within the financial services industry. The preparation of Financial Statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Financial Statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The Financial Statements include the accounts of AgriBank. The Financial Statements do not include the assets, obligations or results of operations of District Associations or service corporations. AgriBank operates as a single segment for reporting purposes.

Recently Issued or Adopted Accounting Pronouncements

We have assessed the potential impact of accounting standards that have been issued by the Financial Accounting Standards Board (FASB) and have determined the following standards to be applicable to our business:

Standard and effective date	Description	Adoption status and financial statement impact
In June 2016, the FASB issued ASU 2016-13 “Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments." The guidance is effective for non-U.S. Securities Exchange Commission filers for our first quarter of 2021. In November 2019, the FASB issued ASU 2019-10 which amends the mandatory effective date for this guidance for certain institutions. We have determined we qualify for the deferral of the mandatory effective date. As a result of the change, the standard is effective for our first quarter of 2023 and early adoption is permitted.	The guidance replaces the current incurred loss impairment methodology with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. Credit losses relating to available-for-sale securities would also be recorded through an allowance for credit losses.	We expect to adopt the standard as of January 1, 2023. We have completed development and independent validation of our model to estimate credit losses for our loan portfolio. Processes and internal controls related to the model and the estimation of credit losses for loans have been substantially designed. We are also evaluating the impact of the standard as it relates to our AFS investment portfolio. We are in the process of drafting disclosures and accounting policies. The extent of the impact on our financial statements will depend on economic conditions, forecasts and the composition of our loan and investment portfolios at the time of adoption.
In April 2019, the FASB issued ASU 2019-04 “Codification Improvements to Topic 326, Financial Instruments—Credit Losses, Topic 815, Derivatives and Hedging, and Topic 825, Financial Instruments.” The guidance is effective the same as the effective dates and transition requirements in Update 2016-13 as amended.	The FASB decided to issue a separate Update for improvements to Updates 2016-01, 2016-13, and 2017-12 to increase stakeholders’ awareness of the amendments and to expedite improvements to the Codification. The amendments in this Update are intended to improve the Codification or correcting its unintended application. The items addressed in the amendments generally are not expected to have a significant effect on current accounting practice or to create a significant administrative cost for most entities.	We have reviewed the accounting standard update and the amendments are not expected to have a material impact on our financial statements. We intend to adopt the portion of the guidance relevant to us concurrent with the adoption of ASU 2016-13 as amended.
In March 2022, the FASB issued ASU 2022-02 "Financial Instruments—Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosures." The guidance is effective at the same time that ASU 2016-13 is adopted.	This guidance eliminates the accounting guidance for troubled debt restructurings by creditors in Subtopic 310-40, Receivables—Troubled Debt Restructurings by Creditors, while enhancing disclosure requirements for certain loan refinancings and restructurings. This guidance also requires that an entity disclose current-period gross write-offs by year of origination for financing receivables and net investments in leases within the scope of Subtopic 326-20, Financial Instruments—Credit Losses—Measured at Amortized Cost.	We intend to adopt the standard concurrently with the adoption of ASU 2016-13 as amended. The adoption of this guidance is not expected to have a material impact on our financial statements, but will modify certain disclosures required under ASU 2016-13.

NOTE 2

Loans and Allowance for Loan Losses

Loans by Type

	June 30, 2022		December 31, 2021	
(in thousands)	Amount	%	Amount	%
Wholesale loans	**$110,071,170**	**88.0 %**	$108,166,365	88.7 %
Retail loans:

Other	**1,264,648**	1,072,245
Total loans	**$14,198,566**	$13,124,276

Portfolio Performance

The primary credit quality indicator we use is the Farm Credit Administration (FCA) Uniform Loan Classification System, which categorizes loans into five categories. The categories are defined as follows:

- Acceptable – assets are non-criticized assets representing the highest quality. They are expected to be fully collectible. This category is further differentiated into various probability of default ratings.
- Other Assets Especially Mentioned (Special mention) – are currently collectible, but exhibit some potential weakness. These assets involve increased credit risk, but not to the point of justifying a substandard classification.
- Substandard – assets exhibit some serious weakness in repayment capacity, equity and/or collateral pledged on the loan
- Doubtful – assets exhibit similar weaknesses as substandard assets. However, doubtful assets have additional weaknesses in existing factors, conditions and values that make collection in full highly questionable.
- Loss – assets are considered uncollectible

[1] The recorded investment in the receivable is the face amount increased or decreased by applicable accrued interest and unamortized premium, discount, finance charges and acquisition costs and may also reflect a previous direct write-down of the investment. The recorded investment may be less than the unpaid principal balance as payments on non-cash basis nonaccrual loans reduce the recorded investment.
[2] Unpaid principal balance represents the contractual principal balance of the loan.

We did not have material loan commitments to borrowers whose loans were at risk as of June 30, 2022 or December 31, 2021.

Troubled Debt Restructurings

Included within our loans are troubled debt restructurings (TDRs). These loans have been modified by granting a concession when a borrower is experiencing financial difficulties. There may be modifications made in the normal course of business that would not be considered TDRs. All risk loans, including TDRs, are analyzed within our allowance for loan losses. Modifications may include interest rate reduction below market, deferral of principal, interest compromise, principal compromise or extension of maturity. Our loans classified as TDRs and activity on these loans were not material during the six months ended June 30, 2022 or 2021. We did not have any material commitments to lend to borrowers whose loans have been modified as TDRs as of June 30, 2022.

Allowance for Loan Losses

Changes in Allowance for Loan Losses

(in thousands)

For the six months ended June 30,	**2022**	2021
Balance at beginning of period	**$37,558**	$39,850
Reversal of loan losses	**(5,000)**	(2,000)
Charge-offs	**(1,682)**	(5,606)
Recoveries	**1,994**	3,218
Balance at end of period	**$32,870**	$35,462

The “Reversal of credit losses” in the Statements of Comprehensive Income includes a reversal of loan losses as presented in the previous chart, and includes any provision for unfunded commitments. The accrued credit losses on unfunded commitments are recorded in “Other liabilities” in the Statements of Condition. Typically, accrued credit losses are relieved and replaced with an allowance for loan loss as the related commitments are funded. There was no net provision for unfunded commitments for the six months ended June 30, 2022.

UREE[1] leverage	**2.2 %**	2.4 %	1.5 %	— %	1.5 %

[1]Unallocated retained earnings and equivalents

Effective January 1, 2022, the FCA regulations slightly modified the calculation of the unallocated retained earnings and equivalents leverage ratio to include certain additional deductions. The modification did not have a material impact on this calculation.

If the capital ratios fall below the total requirements, including the buffer amounts, capital distributions (equity redemptions, dividends and patronage) and discretionary senior executive bonuses are restricted or prohibited without prior FCA approval.

Protected participation certificates of $70 thousand and $98 thousand were included in Capital Stock and Participation Certificates on the Statements of Changes in Shareholders' Equity as of June 30, 2022 and December 31, 2021, respectively.

NOTE 5

Employee Benefit Plans

We participate in Districtwide employee benefit plans. The funded status of the post-employment benefit plans is recorded at the District level. AgriBank's portion of the service cost component of net periodic benefit cost related to these plans is included in "Salaries and employee benefits" on our Statements of Comprehensive Income. For the Pension Restoration Plan, AgriBank's portion of the components of net periodic benefit cost, other than the service cost component, is included in "Other operating expenses" on our Statements of Comprehensive Income.

Net periodic benefit cost	**$21,898**	$22,378	**$(119)**	$(82)

Certain employees in the AgriBank District participate in the AgriBank District Retirement Plan, a governmental defined benefit retirement plan. The employers contribute amounts in accordance with the governing body's funding policy to provide the plan with sufficient assets to meet the benefits to be paid to participants. Refer to the 2021 Annual Report for a more complete description of the Employee Benefit Plans.

For the six months ended June 30, 2022, District employers have contributed $48.9 million to fund pension benefits. District employers anticipate contributing an additional $45.2 million to fund pension benefits in 2022. The Plan Sponsor Committee of the AgriBank District Retirement Plan determines the funding frequency of the plan. The Nonqualified Pension plan is funded as benefits are paid.

NOTE 6

Commitments and Contingencies

In the normal course of business, we have various contingent liabilities and commitments outstanding, primarily commitments to extend credit, which may not be reflected in the Financial Statements. We do not anticipate any material losses because of the contingencies or commitments.

In February 2022, a complaint was filed in the United States District Court for the Southern District of New York by purported beneficial owners of AgriBank's 9.125% subordinated notes originally scheduled to mature in 2019 ("Subordinated Notes"). AgriBank redeemed the Subordinated Notes at par plus accrued interest on July 15, 2016 due to the occurrence of a Regulatory Event (as defined under the Subordinated Notes). The plaintiffs have asserted a breach of contract claim and a breach of implied covenant of good faith and fair dealing claim alleging that AgriBank impermissibly redeemed the Subordinated Notes. On June 20, 2022, AgriBank entered into a settlement agreement with the plaintiffs on all claims, and the lawsuit was dismissed.

Additionally, from time to time we may be named as defendants in certain lawsuits or legal actions in the normal course of business. At the date of these Financial Statements, our management team was not aware of any material actions. However, management cannot ensure that such actions or other contingencies will not arise in the future.

While we are primarily liable for our portion of Systemwide bonds and notes, we are jointly and severally liable for the Systemwide bonds and notes of the other System Banks. The total bonds and notes of the System at June 30, 2022 was $374.8 billion.

NOTE 7

Fair Value Measurements

We use fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Assets and liabilities measured at fair value on a recurring and non-recurring basis consist of federal funds, investments available-for-sale, derivative assets and liabilities, impaired loans, other property owned, and collateral assets and liabilities. The fair value is also calculated and disclosed for other financial instruments that are not measured at fair value on the Statements of Condition. These other financial instruments consist of cash, loans, bonds, and notes and commitments to extend credit and letters of credit. Refer to the 2021 Annual Report for descriptions of the valuation methodologies we use for asset and liabilities recorded at fair value on a recurring or non-recurring basis and for estimating fair value for financial instruments not recorded at fair value.

A fair value hierarchy is used for disclosure of fair value measurements to maximize the use of observable inputs. The valuation hierarchy is based on the transparency of inputs to the valuation of an asset or liability as of the measurement date. A financial instrument's categorization within the valuation hierarchy is based on the lowest level of input that is significant to the fair value measurement. Refer to the 2021 Annual Report for a more complete description of these input levels.

NOTE 8

Derivative and Hedging Activity

Use of Derivatives

We maintain an overall interest rate risk management strategy that incorporates the use of derivative products to minimize significant unplanned fluctuations in earnings that are caused by interest rate volatility. Our goals are to manage interest rate sensitivity by modifying the repricing or maturity characteristics of certain balance sheet assets and liabilities so that movements in interest rates do not adversely affect net interest margin. As a result of interest rate fluctuations, fixed-rate liabilities will appreciate or depreciate in market value. The effect of this unrealized appreciation or depreciation is expected to be substantially offset by our gains or losses on the derivative instruments that are linked to fixed-rate liabilities. Another result of interest rate fluctuations is that the interest expense of floating-rate liabilities will increase or decrease. The effect of this variability in earnings is expected to be substantially offset by our gains and losses on the derivative instruments that are linked to these floating-rate liabilities. We consider the use of derivatives to be a prudent method of managing interest rate sensitivity, as it prevents earnings from being exposed to undue risk posed by changes in interest rates.

All of our derivative activities are monitored by the Asset/Liability Committee (ALCO) as part of the committee's oversight of our asset/liability and treasury functions. ALCO ensures that the Bank's derivative hedging strategies are implemented in line with the board's risk appetite and are incorporated into our overall asset/liability risk-management framework.

Interest Rate Risk Management

We primarily enter into derivative transactions, particularly interest rate swaps, to reduce funding costs, improve liquidity and manage interest rate sensitivity. Interest rate swaps allow us to change the characteristics of fixed- or floating-rate debt we issue by swapping to a synthetic fixed or floating rate lower than those available to us if borrowings were made directly. Under interest rate swap arrangements, we agree with other parties to exchange, at specified intervals, payment streams calculated on a specified notional principal amount, with at least one stream based on a specified floating-rate index.

Other Derivative Uses

Other uses for derivatives are as follows:

- We also facilitate interest rate swaps to qualified borrowers of the District Associations. These swaps allow qualified borrowers to manage their interest rate risk and lock in a fixed interest rate similar to a fixed-rate loan. We manage the interest rate risk from customer swaps with the execution of offsetting interest rate swap transactions.
- We may utilize commodity derivative instruments to manage mineral income volatility. We may purchase commodity put options to protect against a decline in oil prices, which could significantly impact our mineral income. We had put option contracts with a total notional of 478 thousand and 688 thousand barrels of oil as of June 30, 2022 and December 31, 2021, respectively, which are not included in the table below.

Derivative Instruments Activity (in notional amount)

(in millions)	Receive-Fixed Swaps	Pay-Fixed Swaps	Floating-for-Floating	Other Derivatives	Total
As of December 31, 2020	$1,505	$1,372	$2,000	$148	$5,025
Terminations	—	(705)	—	—	(705)
Maturities/amortization	(955)	(52)	(600)	(3)	(1,610)
As of June 30, 2021	$550	$615	$1,400	$145	$2,710
As of December 31, 2021	$900	$5,542	$1,400	$142	$7,984
Additions	**550**	**3,895**	**2,300**	**—**	**6,745**
Maturities/amortization	**—**	**(5,523)**	**—**	**(23)**	**(5,546)**
As of June 30, 2022	**$1,450**	**$3,914**	**$3,700**	**$119**	**$9,183**

Other Derivatives consisted of retail customer derivative products.

Credit Risk Management

By using derivative instruments, we are subject to credit and market risk. If a counterparty is unable to perform under a derivative contract, our credit risk equals the net amount due to us. Generally, when the fair value of a derivative contract is positive, we have credit exposure to the counterparty, creating credit risk for us. When the fair value of the derivative contract is negative, we do not have credit exposure.

With the exception of retail customer swaps, to minimize the risk of credit losses, we deal only with counterparties that have an investment-grade or better credit rating from a rating agency, and we monitor the credit standing and levels of exposure to individual counterparties. As of June 30, 2022, we do not anticipate nonperformance by any of these counterparties. We typically enter into master agreements that contain netting provisions. These provisions allow us to require the net settlement of covered contracts with the same counterparty in the event of default by the counterparty on one or more contracts. All such derivative contracts are supported by bilateral collateral agreements with counterparties requiring collateral to be posted in the event certain dollar thresholds of exposure of one party to the other are reached. These thresholds vary depending on the counterparty's current credit rating.

Bilateral Derivatives

(in thousands)	**June 30, 2022**	December 31, 2021
Notional amount[1]	**$4,118,764**	$1,942,175
Cash collateral posted with counterparties	**950**	24,750

[1] Excludes notional amount for commodity hedges

We also clear derivative transactions through a futures commission merchant (FCM) with a clearinghouse or a central counterparty (CCP). When the swap is cleared by the two parties, the single bilateral swap is divided into two separate swaps with the CCP becoming the counterparty to both of the initial parties to the swap. CCPs have several layers of protection against default including margin, member capital contributions and FCM guarantees of their customers' transactions with the CCP. FCMs also pre-qualify the counterparties to all swaps that are sent to the CCP from a credit perspective, setting limits for each counterparty and collecting initial and variation margin daily from each counterparty for changes in the value of cleared derivatives. The margin collected from both parties to the swap protects against credit risk in the event a counterparty defaults. The initial and variation margin requirements are set by and held for the benefit of the CCP. Additional initial margin may be required and held by the FCM, due to its guarantees of its customers' trades with the CCP. Typically, daily variation margin payments are recognized as settlements rather than collateral posted. Initial margin requirements consider volume of notional outstanding, duration of outstanding derivatives and market volatility.

Centrally Cleared Derivatives

(in thousands)	**June 30, 2022**	December 31, 2021
Notional Amount	**$5,063,764**	$6,042,175
Initial margin posted with counterparties	**25,016**	5,811

All margin posted by or with counterparties was in cash. We had no securities posted by counterparties or to counterparties for any period presented.

Accounting for Derivatives

Fair Value Hedges: For derivative instruments that are designated and qualify as a fair value hedge, the gain or loss on the derivative as well as the offsetting gain or loss on the hedged item attributable to the hedged risk are recognized in current earnings. We include the gain or loss on the derivative in the same line item ("Interest expense") on the Statements of Comprehensive Income as the offsetting gain or loss on the related hedged item.

Cash Flow Hedges: For derivative instruments that are designated and qualify as a cash flow hedge, the gain or loss on the derivative is reported as a component of "Other comprehensive loss" until earnings are affected by the variability of the cash flows of the hedged transaction. When reclassified to earnings, we include the gain or loss on the derivative in the “Interest expense” line item on the Statements of Comprehensive Income.

Derivatives not Designated as Hedges: For derivatives not designated as a hedging instrument, the related change in fair value is recorded in current period earnings in “Other non-interest (loss) income, net” on the Statements of Comprehensive Income.

Financial Statement Impact of Derivatives

The following tables present the gross fair value, offsetting and net exposure amounts of derivative assets and derivative liabilities. The fair value of our derivative contracts are presented as “Derivative assets” and “Derivative liabilities” on the Statements of Condition, and are presented on a net basis for counterparties with master netting agreements.

	June 30, 2022		December 31, 2021	
(in thousands)	**Fair Value Assets**	**Fair Value Liabilities**	Fair Value Assets	Fair Value Liabilities
Derivatives designated as hedging instruments:				
Receive-fixed swaps	**$2,246**	**$34,777**	$725	$3,251
Pay-fixed swaps	**23,911**	**2,475**	—	53,576
Floating-for-floating swaps	**4,133**	**629**	—	1,403
Total derivatives designated as hedging instruments	**30,290**	**37,881**	725	58,230
Derivatives not designated as hedging instruments:				
Pay-fixed swaps	**7,590**	**—**	306	2,676
Other derivative products	**369**	**6,328**	5,183	—
Total derivatives not designated as hedging instruments	**7,959**	**6,328**	5,489	2,676
Credit valuation adjustments	**(304)**	**—**	(7)	—
Total gross amounts of derivatives	**$37,945**	**$44,209**	$6,207	$60,906
Gross amounts offset in Statements of Condition	**(29,409)**	**(29,409)**	(1,031)	(1,031)
Variation margin settled	**—**	**(6,448)**	—	(4,591)
Net amounts in Statements of Condition	**$8,536**	**$8,352**	$5,176	$55,284

(in thousands)	**June 30, 2022**	December 31, 2021
Derivative assets, net	**$8,536**	$5,176
Derivative liabilities, net	**(8,352)**	(55,284)
Accrued interest payable on derivatives, net	**(3,280)**	(1,196)
Gross amounts not offset in Statements of Condition:		
Cash collateral posted with counterparties	**25,966**	30,561
Net exposure amounts	**$22,870**	$(20,743)

The fair value of derivatives includes a credit valuation adjustment (CVA). The CVA reflects credit risk of each derivative counterparty to which we have exposure, net of any collateral posted by the counterparty, and an adjustment for our credit worthiness where the counterparty has exposure to us. The CVA was not material in any of the periods presented. The change in the CVA for the period is included in "Interest expense" on the Statements of Comprehensive Income.

In relation to our cash flow hedges, the following table presents the amount of other comprehensive income (OCI) recognized on derivatives and the amount reclassified from accumulated other comprehensive income (AOCI) into earnings on effective cash flow hedges. During the next 12 months, $18.9 million of net losses in AOCI on derivative instruments that qualified as cash flow hedges are expected to be reclassified into earnings.

Cash Flow Hedging Relationships

(in thousands) **For the six months ended June 30, 2022**	**Amount of Gain Recognized in OCI on Derivatives**	**Amount of Loss Reclassified from AOCI into Income**
Pay-fixed swaps	**$69,000**	**$(17,434)**
Floating-for-floating swaps	**4,155**	**(751)**
Total	**$73,155**	**$(18,185)**

(in thousands) For the six months ended June 30, 2021	Amount of Gain (Loss) Recognized in OCI on Derivatives	Amount of Loss Reclassified from AOCI into Income
Pay-fixed swaps	$34,704	$(19,126)
Floating-for-floating swaps	(301)	(503)
Total	$34,403	$(19,629)

The following table shows the effect of fair value and cash flow hedge accounting as well as economic hedges on the Statements of Comprehensive Income for the six months ended June 30, 2022.

(in thousands)	Other non-interest (loss) income, net		Interest Expense	
For the six months ended June 30,	**2022**	2021	**2022**	2021
Total amount of income and expense line items presented in the Statements of Comprehensive Income in which the effects of the fair value, cash flow and economic hedges are recorded:	**$(2,555)**	$4,206	**$731,189**	$596,365
Asset and Liability Management Positions				
Fair value hedges:				
Interest rate derivatives	**—**	—	**30,302**	1,973
Bonds and notes	**—**	—	**(29,534)**	(2,065)
Cash flow hedges:				
Interest rate derivatives	**—**	—	**18,186**	19,629
Economic hedges:				
Interest rate derivatives	**(486)**	(224)	**—**	—
Commodity derivatives	**(1,161)**	—	**—**	—

Note: We do not exclude components from effectiveness testing for fair value or cash flow hedges. We reclassified gains or losses into earnings as a result of the discontinuance of certain cash flow hedges during the six months ended June 30, 2022 and 2021.

The following table shows the cumulative hedging adjustment (fair value adjustment) for fair value hedges that are included in the carrying amount of the hedged assets (liabilities):

	Carrying Amount of the Hedged Item		Cumulative Fair Value Adjustment Included in the Carrying Amount of the Hedged Item	
(in thousands)	**June 30, 2022**	December 31, 2021	**June 30, 2022**	December 31, 2021
Line Item on the Statements of Condition				
Bonds and notes	**$1,416,407**	$896,191	**$(31,958)**	$(2,424)

Note: AgriBank did not have any material hedging adjustments for discontinued fair value hedges.

NOTE 9

Accumulated Other Comprehensive Loss

Changes in Components of Accumulated Other Comprehensive Income (Loss)

(in thousands)	**Not-other-than-temporarily-impaired Investments**	**Derivatives and Activity**	**Employee Benefits Activity**	**Total**
Balance at December 31, 2020	$90,784	$(201,629)	$(1,990)	$(112,835)
Other comprehensive (loss) income before reclassifications	(58,935)	34,403	—	(24,532)
Amounts reclassified from accumulated other comprehensive loss	—	19,629	109	19,738
Net other comprehensive (loss) income	(58,935)	54,032	109	(4,794)
Balance at June 30, 2021	$31,849	$(147,597)	$(1,881)	$(117,629)
Balance at December 31, 2021	$(78,338)	$(130,663)	$(1,954)	$(210,955)
Other comprehensive (loss) income before reclassifications	**(630,817)**	**73,155**	—	**(557,662)**
Amounts reclassified from accumulated other comprehensive loss	**3,998**	**18,185**	**118**	**22,301**
Net other comprehensive (loss) income	**(626,819)**	**91,340**	**118**	**(535,361)**
Balance at June 30, 2022	**$(705,157)**	**$(39,323)**	**$(1,836)**	**$(746,316)**

The derivatives and hedging activity and employee benefit plans activity reclassified from AOCI is included in "Interest expense" and "Other operating expenses" respectively, on the Statements of Comprehensive Income. Investments activity reclassified from AOCI is included in "Other non-interest income, net" on the Statements of Comprehensive Income.

NOTE 10

Subsequent Events

We have evaluated subsequent events through August 8, 2022, which is the date the Financial Statements were available to be issued. There have been no material subsequent events that would require recognition in the Quarterly Financial Statements or disclosure in the Notes to those Financial Statements.

NOTE 11

AgriBank and District Associations

The accompanying Financial Statements exclude financial information of District Associations. AgriBank and District Associations are collectively referred to as the "District." We separately publish certain unaudited combined AgriBank District financial information, including a condensed statement of condition and statement of income, which can be found on our website at www.AgriBank.com.

Effective January 1, 2022, two of our District Associations, AgCountry Farm Credit Services, ACA and Farm Credit Services of North Dakota, ACA merged and are doing business as AgCountry Farm Credit Services, ACA with headquarters in Fargo, N.D.

In 2021, Delta, ACA's (Delta's) board of directors determined that it was in the best interests of Delta to voluntarily dissolve, and approved a preliminary resolution to proceed with a plan to voluntarily liquidate and dissolve the Association (the Plan). On March 17, 2022, the FCA preliminarily approved the Plan. On April 14, 2022, Delta's stockholders approved the Plan, which includes an agreement to sell the loan portfolio to another District Association. Subsequently, on April 19, 2022, the FCA provided final approval of the Plan. The sale of Delta's entire loan portfolio to AgHeritage Farm Credit Services, ACA occurred on May 1, 2022. All employees were terminated effective May 31, 2022. The assets are under the control of a liquidation agent and the ultimate timing of the final liquidation is uncertain and subject to multiple considerations.

Additional Regulatory Information

AgriBank, FCB

(Unaudited)

Regulatory Capital Disclosures

The following information contains quarterly regulatory disclosures as required under FCA Regulations 628.62 and 628.63 for risk-adjusted ratios, common equity tier 1, tier 1 capital and total capital ratios. Refer to Note 4 of the accompanying Financial Statements for information regarding the statutorily required permanent capital ratio. These disclosures should be read in conjunction with our 2021 Annual Report, which includes additional qualitative disclosures. Unless otherwise noted, there have been no material changes to the qualitative disclosures contained in the 2021 Annual Report. As required by FCA regulations, these disclosures, including regulatory capital ratios, are made available for at least three years and can be accessed in our financial reports at www.AgriBank.com.

The following table summarizes the interim disclosure requirements and indicates where each matter is disclosed in this quarterly report.

Disclosure Requirement	Description	Second Quarter 2022 Report Reference
Scope of Application	Corporate entity and consolidated subsidiaries	35
Capital Structure	Regulatory capital components	35
Capital Adequacy	Risk-weighted assets Regulatory capital ratios	36
Capital Buffers	Quantitative disclosures	36
Credit Risk	Summary of exposures Geographic distribution Additional industry and counterparty distribution Contractual maturity Impaired loans and allowance for credit losses	37-38
Counterparty Credit Risk-Related Exposures	Counterparty exposures	38-39
Credit Risk Mitigation	Exposures with reduced capital requirements	39
Securitization	Securitization exposures	39
Equities	Equity exposures	40
Interest Rate Risk for Non-trading Activities	Interest rate sensitivity	40

Scope of Application

As of June 30, 2022, the AgriBank District has 13 Agricultural Credit Associations, each of which has wholly owned Farm Land Credit Association and Production Credit Association subsidiaries. AgriBank is primarily owned by these 13 Farm Credit Associations. AgriBank is the primary funding source for all District Associations. AgriBank has no subsidiaries; therefore, the Financial Statements are only those of AgriBank and are not consolidated with any other entity.

Regulatory adjustments and deductions made to T2[(4)]	**—**
Total standardized risk-weighted assets	**$42,851,504**

[(1)] Includes exposures to Farm Credit System entities

[(2)] Includes exposures to Loans to other financing institutions (OFIs) that are risk-weighted as U.S. depository institutions and credit unions

[(3)] AT1 capital is additional tier 1 capital

[(4)] T2 is tier 2 capital

As of June 30, 2022, the Bank was well-capitalized and exceeded all capital requirements to which it was subject, including applicable capital buffers. Because capital exceeded the buffer requirements, the Bank currently has no limitations on its distributions and discretionary bonus payments. The aggregate amount of eligible retained income, as regulatorily calculated, was $556.8 million as of June 30, 2022.

Regulatory Capital Requirements and Ratios

	Regulatory Minimums	Required Buffer	As of June 30, 2022	Calculated Buffer
Common equity tier 1 capital ratio	4.5 %	2.5 %	**16.8 %**	**12.3 %**
Tier 1 capital ratio	6.0 %	2.5 %	**17.4 %**	**11.4 %**
Total capital ratio	8.0 %	2.5 %	**17.5 %**	**9.5 %**
Capital conservation buffer				**9.5 %**
Tier 1 leverage ratio	4.0 %	1.0 %	**5.1 %**	**1.1 %**
Leverage buffer				**1.1 %**

Credit Risk

Refer to Note 2 of the accompanying Financial Statements for amounts of impaired loans with and without related allowance, loans in nonaccrual status and greater than 90 days past due, loans past due greater than 90 days and still accruing, the allowance at the end of each reporting period, charge-offs during the period, and changes in components of our allowance for credit losses. Allowance is determined individually by loan or by pool based on homogeneous characteristics such as probability of default (PD) and loss given default (LGD). Allowance needs by geographic region are only considered in rare circumstances, for example flooding, drought, etc., that may not otherwise be reflected in the PD and LGD. There was no allowance attributed to a geographic area as of June 30, 2022. Refer to Note 3 for a summary of the contractual maturity, amortized cost, fair value and weighted average yield of investment securities by type. All impaired loans, past-due loans and allowance are within our retail portfolio. The retail portfolio is substantially concentrated in our chartered territory and has not changed significantly since December 31, 2021.

Refer to the Capital Adequacy and Capital Buffers section for information regarding types of credit risk exposures.

Counterparty Credit Risk and Credit Risk Mitigation

Credit Risk Mitigation Related to Derivatives

Refer to the Derivative Financial Instruments section in the Management's Discussion and Analysis and Note 8 of the accompanying Financial Statements for more information on credit risk mitigation related to derivatives.

We have not entered into any credit default swap agreements to mitigate our credit exposure to counterparties. Refer to Note 8 of the accompanying Financial Statements for the gross positive fair value of contracts, collateral held and the net unsecured credit exposure. The derivative portfolio is not covered by guarantees.

Current credit exposure is the greater of $0 or the fair market value of a single derivative contract. The net current credit exposure is the greater of the net sum of all positive and negative fair market value of the individual derivative contracts subject to the qualifying master netting agreement or $0. The net current credit exposure is equal to the gross positive fair values as disclosed in Credit Exposures - Derivatives table above.

Credit Risk Mitigation Related to Loans
Financial collateral is not used to mitigate credit risk in our loan portfolio.

Loan and Commitment Exposures Covered by Guarantees

(in thousands) **As of June 30, 2022**	**3-month Average Daily Balance**	**Risk-weighted 3-month Average Daily Balance**
Unconditionally guaranteed		
Loans	**$193**	**$—**
Conditionally guaranteed		
Loans	**$24,491**	**$4,898**
Commitments	**30**	**3**
Total	**$24,714**	**$4,901**

Credit Risk Mitigation Related to Investments
Financial collateral is not used to mitigate credit risk in our investment portfolio.

Investment Exposures Covered by Guarantees

(in thousands) **As of June 30, 2022**	**3-month Average Daily Balance**	**Risk-weighted 3-month Average Daily Balance**
Unconditionally guaranteed	**$11,630,463**	**$—**
Conditionally guaranteed	**1,900,186**	**380,037**
Total	**$13,530,649**	**$380,037**

Credit risk in our investment portfolio is largely mitigated by investing primarily in securities issued or guaranteed by the U.S. government or one of its agencies. Credit risk in our investment portfolio primarily exists in investment securities that are not guaranteed by the U.S. government or one of its agencies, which include our certificates of deposit, commercial paper, non-agency mortgage-backed securities and asset-backed securities, all of which were of high credit quality and met eligibility requirements as of June 30, 2022.

Securitization

For the three months ended June 30, 2022, we did not hold any off-balance sheet securitization exposures, retain any resecuritization exposures, nor were any securitization exposures deducted from capital.

Securitization Exposures

(3-month average daily balance in thousands) **As of June 30, 2022**	**Exposure**	**Weighted average risk-weight factor**	**Risk-weighted assets**
Gross up risk weight bands:			
100%	**$72,744**	**100%**	**$72,744**
> 100% and < 1,250%	**26,569**	**214%**	**56,809**
1250%	**—**	**1250%**	**—**
Total risk-weighted securitization assets	**$99,313**	**130%**	**$129,553**

Equities

We are a limited partner in certain Rural Business Investment Companies (RBICs) for various relationship and strategic reasons. These are not publicly traded, and the book value approximates fair value. There have been no sales or liquidations of these investments during the period. As of June 30, 2022, all RBICs were accounted for under the equity method; therefore, no unrealized gains (losses) exist for the exposure. Further, we do not believe any significant latent revaluation gains (losses) exist for these exposures. No RBIC exposures are included in tier 1 or tier 2 capital.

Equity Investments included in Capital Ratios

(in thousands) **As of June 30, 2022**	**Disclosed in Other Assets**	**Life-to-Date losses recognized in Retained Earnings**[1]
RBIC	**$24,219**	**$6,051**

[1] Retained earnings is included in common equity tier 1, tier 1 and total capital ratios

Interest Rate Risk

Our policies establish a maximum variance from our base case in a plus or minus 200 basis point change in rates, except when the U.S. Treasury three-month rate is below 4 percent, at which time the minus scenario is limited to one-half of the U.S. Treasury three-month rate. Because of the low interest rates at June 30, 2022, the down scenario is limited to a down 85 basis point change.

NII Sensitivity Analysis

	Basis Point Interest Rate Change		
As of June 30, 2022	**Down 85**	**Up 100**	**Up 200**
Immediate Change (Shock):			
NII sensitivity	**0.8 %**	**(1.0)%**	**(1.8)%**
Board policy	**(15.0)%**		**(15.0)%**
Gradual Change (Ramp):			
NII sensitivity		**(0.2)%**	**(0.4)%**

Economic Value of Equity (EVE) Sensitivity Analysis

	Basis Point Interest Rate Change		
As of June 30, 2022	**Down 85**	**Up 100**	**Up 200**
Immediate Change (Shock):			
EVE sensitivity	**3.0 %**	**(2.4)%**	**(4.4)%**
Board policy	**(12.0)%**		**(12.0)%**
