AGRIBANK 2023 QUARTERLY REPORT
JUNE 30, 2023

AgriBank 
FARM CREDIT BANK

Copies of Quarterly and Annual Reports are available upon request by contacting AgriBank, FCB, 30 E. 7th Street, Suite 1600, St. Paul, MN 55101 or by calling (651) 282-8800. Reports are also available at www.AgriBank.com.

Management's Discussion and Analysis

AgriBank, FCB

(Unaudited)

The following commentary is a review of the financial condition and results of operations of AgriBank, FCB (AgriBank, or the Bank). This information should be read in conjunction with the accompanying Financial Statements, the Notes to the Financial Statements and the 2022 Annual Report.

AgriBank is part of the customer-owned, nationwide Farm Credit System. Under Farm Credit's cooperative structure, AgriBank is primarily owned by Farm Credit Associations, which provide financial products and services to rural communities and agriculture. AgriBank obtains funds and provides funding and financial solutions to those Associations. AgriBank and those Associations comprise the AgriBank District. The AgriBank District covers a 15-state area stretching from Wyoming to Ohio and Minnesota to Arkansas.

Forward-Looking Information

Any forward-looking statements in this Quarterly Report are based on current expectations and are subject to uncertainty and changes in circumstances. Actual results may differ materially from expectations due to a number of risks and uncertainties. More information about these risks and uncertainties is contained in our 2022 Annual Report. AgriBank undertakes no duty to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Financial Overview

Net income remained strong as our year-to-date return on assets (ROA) ratio of 54 basis points was above our target of 50 basis points. Net interest income increased compared to the prior year primarily due to the continued increase in the average daily balance of our loan portfolio as well as higher earnings on investment securities as a result of widened credit spreads.

Loan portfolio credit quality remained strong with 99.5 percent of our total loan portfolio in the acceptable category, which reflects the overall financial strength of District Associations and their underlying portfolios of retail loans. Credit quality of our retail loan portfolio (accounting for approximately 11 percent of our total loan portfolio) decreased slightly to 95.4 percent acceptable as of June 30, 2023, compared to 95.8 percent acceptable at December 31, 2022. See the Loan Portfolio section for additional discussion about how other factors may impact our loan portfolio performance.

Strong capital levels ensure we are well-positioned to manage the cyclical characteristics of the agricultural market, as well as the challenges and uncertainty of the overall economic environment. Refer to the Loan Portfolio and Funding, Liquidity and Shareholders' Equity sections for further discussion.

Economic Conditions

Interest Rate Environment

Economic activity is facing headwinds due to tightening financial conditions. U.S. gross domestic product is forecasted to grow by approximately 1.5 percent in 2023 and 0.5 percent in 2024. The unemployment rate remains below 4.0 percent and is expected to remain low with the current high number of job openings. Consumer price inflation has been elevated due to imbalances between supply and demand. The monthly inflation rate has improved significantly, but inflation is still running well above the Federal Reserve's 2.0 percent target on an annualized basis.

Due to the high price inflation rate, the Federal Open Market Committee (FOMC) has tightened monetary policy and further raised the federal funds rate to a target range of 5.25 to 5.50 percent at its July 2023 meeting. The FOMC projects that it may increase the fed funds target rate by an additional 25 basis points through the end of 2023. As of the beginning of August 2023, the fed funds futures market suggests the FOMC will maintain the fed funds rate near its current level through the end of 2023.

With the high rate of price inflation and monetary tightening by the FOMC, U.S. Treasury yields moved much higher in 2022. Short-term U.S. Treasury yields have moved even higher in 2023, as the FOMC has raised the fed funds rate. Long-term U.S. Treasury yields are near levels from the end of 2022. The U.S. Treasury yield curve remains inverted with short-term bond yields above longer-term bond yields. Economists expect the U.S. Treasury bond yield curve to remain inverted as the FOMC maintains the fed funds target rate above longer term U.S. Treasury yields in 2023.

We manage interest rate risk consistent with policies established by the board of directors and limits established by AgriBank's Asset/Liability Committee (ALCO). While many factors can impact our net interest income, management expects that financial performance will remain relatively consistent under most interest rate environments over the next 12 months (refer to the Interest Rate Risk Management section).

Agricultural Conditions

The U.S. Department of Agriculture's Economic Research Service (USDA-ERS) released its initial forecast of the U.S. aggregate farm income and financial conditions for 2023 and updated its 2022 forecast on February 7, 2023. The revised 2022 net farm income (NFI) forecast of \$162.7 billion represented a \$21.8 billion nominal increase from 2021, up 15.5 percent, with income increasing for the third consecutive year. When adjusting for inflation, the 2022 NFI forecast would be at the highest level since 1973. The initial 2023 NFI projection of \$136.9 billion would represent a nominal decline of \$25.8 billion, or 15.9 percent, from the revised 2022 NFI forecast. While the initial NFI projection for 2023 is down substantially from 2022, if realized, that income level would still surpass the 20-year average estimated real net farm income level by \$28.7 billion or 26.6 percent and would mark the fifth highest level since the 1970s in real terms. USDA-ERS forecasts a slight deterioration in the farm sector balance sheet as total sector debt increases at a slightly higher pace than the increase in assets, resulting in a small increase in the debt-to-asset ratio for the first time since 2020. At 13.2 percent, the 2023 farm sector debt-to-asset ratio would be slightly above the estimated 20-year average, but well below the all-time highs of over 20 percent in the mid-1980s.

Commodity markets experienced mixed price moves during the second quarter of 2023. The crop markets have been especially volatile given escalation of the conflict between Russia and Ukraine and challenging weather in many of the core growing regions in the U.S. The markets have also been influenced by USDA corn and soybean acreage estimates that were outside the range of market expectations. Growers have contended with drought conditions in a significant portion of the Corn Belt through mid-July. As of July 18, 2023, the U.S. Drought Monitor indicated that 55.0 percent of corn production was affected by moderate to exceptional drought conditions, while 50.0 percent of soybean production was affected by drought. Timely, but scattered, rains in late June and early July have reduced the area impacted, but challenging early season conditions and forecasts for an extended period of heat during key crop development periods have reduced the yield potential for the 2023 corn crop. Hot and dry conditions into August may also reduce the yield potential for soybeans if conditions persist, raising price expectations for soybeans. USDA's June Acreage report estimated that U.S. corn acreage increased by 5.5 million acres in 2023 to 94.1 million acres. That estimate was 2.1 million acres above the March intentions, above the range of market expectations and is the largest acreage in 10 years. The higher USDA corn acreage estimate came at the expense of soybean acreage, which was estimated to decline by 4.0 million acres in 2023. The June Acreage report was supportive for soybean prices and negative for the corn market; however, lower corn yield expectations, the end of the U.N. Black Sea export corridor deal and recent attacks at Ukrainian ports have provided underlying support for crop markets.

Cattle prices remain historically high due to the combination of solid beef demand and tight cattle availability. Fewer cattle on feed, lower slaughter levels and lighter cattle weights have kept beef supplies tight and prices firm through the seasonally strong grilling season. Those factors continue to support profitable cattle feeding margins. The hog market posted a strong turnaround in June and July with the CME lean hog index up over 40 percent from the April lows, while the wholesale pork price increased more than 50 percent over that period. Improving domestic and export pork sales and restrained production levels have supported a return to above breakeven levels for hog producers as of mid-July. Broiler and egg markets have been challenged by supply growth and continuing elevated feed costs. The prevalence of contract growers for broilers and cost-plus arrangements in the egg market shift much of the price and margin risk from growers to processors for those industries. The dairy market experienced significant margin erosion during the second quarter of 2023. The combination of growing global milk production, seasonally strong U.S. output, lackluster export demand and high feed costs have tempered the outlook for the U.S. dairy sector.

Despite the high input cost environment for crop producers and high feed costs for the animal protein sector, the U.S. agriculture sector remains well positioned in 2023. The farm sector balance sheet remains strong, and while farm sector working capital is expected to deteriorate in 2023, many producers' working capital positions should remain favorable. Many factors, including weather, trade, government and monetary policy, global agricultural production levels, and pathogenic outbreaks in livestock and poultry, may keep agriculture market volatility elevated for the next few years. Implementation of cost-saving technologies, marketing methods and risk management strategies will continue to cause a wide range of results among the respective agricultural producers.

Land Values

The AgriBank District continues to monitor agricultural land values. We conduct an annual Benchmark Survey, completed by licensed real estate appraisers, on representative benchmark farms in 34 regions of the District. The District's most recent real estate market value survey, based on the 12-month period ending June 30, 2022, indicated that District real estate value changes in the regions ranged from a 5.8 percent to 40.8 percent annual increase. Farmers, ranchers and investors remain interested in acquiring farmland; however, elevated prices, higher interest rates and lower returns may dampen demand for land purchases, which could negatively impact farmland values in the District.

The Federal Reserve Banks of Chicago, Kansas City and Minneapolis reported on the change in farmland values from the end of the first quarter 2022 to the end of the first quarter 2023 in their respective districts. The Federal Reserve district reports indicated annual regional increases in non-irrigated farmland values ranging from 9.0 to 11.3 percent.

The USDA land value survey, which is conducted annually using June values and published in August of each year, is based on a survey of agricultural producers across the United States. Results of the 2022 survey showed increases of 13.0 percent for overall farm real estate values and 14.2 percent for cropland values specific to the AgriBank District.

AgriBank District credit risk policies focus on loan repayment capacity in addition to conservative loan-to-value levels on the collateral that secures loans. Although Farm Credit Administration (FCA) regulations allow real estate mortgage loans of up to 85 percent of appraised value, most District Associations generally limit lending to 65 percent or less at origination. While underwriting exceptions on loan-to-appraised-value are sometimes granted, in such cases loans are typically structured with shorter amortization schedules and/or additional principal payments in the early years to reduce risk. With increased land values across the District, Associations continue to incorporate credit underwriting factors such as sustainable repayment capacity and lending caps per acre based on land's long-term income-producing capacity. These proactive lending practices reduce the impact on District loan portfolios if land values materially decline.

Loan Portfolio

Components of Loans

(in thousands)	June 30, 2023	December 31, 2022
Accrual loans:		
Wholesale loans	\$122,181,679	\$118,660,270
Retail loans:		
Real estate mortgage	5,070,122	4,696,993
Production and intermediate-term	7,993,577	7,866,773
Loans to other financing institutions (OFIs)	1,056,188	749,969
Other	1,663,795	1,454,782
Total retail loans	15,783,682	14,768,517
Nonaccrual loans	62,205	41,994
Total loans	\$138,027,566	\$133,470,781

The Other category was primarily composed of agribusiness and rural residential real estate loans.

Loans totaled \$138.0 billion at June 30, 2023, an increase of \$4.6 billion from December 31, 2022. Within total loans, growth in wholesale loans was primarily driven by a rise in agribusiness, energy and communications loans throughout the AgriBank District.

Retail loans increased, driven by increases in real estate mortgage loans, loans to other financing institutions (OFIs) and production and intermediate-term loans. The increases in real estate mostly relates to purchases in our asset pool program during the second quarter of 2023. Increases in production and intermediate-term loans were aligned with seasonable expectations within our crop input financing portfolio.

Overall, credit quality remains strong, primarily supported by favorable commodity prices. As a majority of our loans are wholesale loans, we expect our credit quality will remain strong even as some District Associations may experience declines in their retail credit

quality in the future. Each District Association has allowances for loan losses, earnings and capital that absorb their credit losses before their losses would impact our wholesale loans.

The credit quality of our total loan portfolio remained strong at 99.5 percent in the acceptable category at June 30, 2023, compared to 99.6 percent December 31, 2022. As of June 30, 2023, all outstanding wholesale loans were classified as acceptable. Adversely classified loans remained at 0.2 percent at June 30, 2023, and December 31, 2022. Credit quality of our retail loan portfolio decreased slightly to 95.4 percent acceptable as of June 30, 2023, compared to 95.8 percent acceptable at December 31, 2022, related to a few large credits. While credit quality is currently strong, many factors could impact borrowers and may result in changes to credit quality in our loan portfolio.

Effective January 1, 2023, we adopted Accounting Standards Update (ASU) 2016-13 “Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments.” This guidance established a single allowance framework for all financial assets measured at amortized cost and certain off-balance sheet credit exposures, and replaced the incurred loss guidance. This framework requires that management’s estimate reflects credit losses over the asset’s remaining expected life and considers expected future changes in macroeconomic conditions and is referred to as the Current Expected Credit Loss (CECL) model. The allowance for credit losses comprises the allowance for credit losses on loans, unfunded commitments and investment securities.

Components of Nonperforming Assets

(in thousands)	June 30, 2023	December 31, 2022
Nonaccrual loans	\$62,205	\$41,994
Accruing loans 90 days or more past due	25,443	746
Total nonperforming loans	87,648	42,740
Other property owned	—	—
Total nonperforming assets	\$87,648	\$42,740
As a percent of retail loans		
Nonperforming loans	0.56 %	0.29 %
Nonaccrual loans	0.39 %	0.28 %
Delinquencies	0.62 %	0.63 %
As a percent of loans		
Nonperforming loans	0.06 %	0.03 %
Nonaccrual loans	0.05 %	0.03 %
Delinquencies	0.07 %	0.07 %

Note: Prior to the adoption of CECL effective January 1, 2023, nonperforming assets included accrued interest receivables. Additionally, certain prior period ratios have been updated to conform to current period presentation.

Due to the low level of nonperforming assets, movement of a single loan or borrower impacts the percent of nonperforming assets. Despite the increase compared to year-end, nonperforming assets remain at acceptable levels, and total nonperforming loans as a percentage of total loans remain within our established risk management guidelines. Nonperforming loans were primarily concentrated in the production and intermediate-term and real estate mortgage sectors. At June 30, 2023, 54.0 percent of nonaccrual loans were current as to principal and interest.

The seasonality of our crop input financing portfolio was the primary driver of the increase within accruing loans 90 days or more past due category. The risk in the crop input financing portfolio is significantly mitigated by credit enhancements, including guarantees with third parties that are in a strong financial position. Our accounting policy requires loans past due 90 days to be transferred into nonaccrual status unless adequately secured and in the process of collection. Based on our analysis, all accruing loans 90 days or more past due were eligible to remain in accruing status.

Allowance Coverage Ratios

	June 30, 2023	December 31, 2022
Allowance for loan losses as a percentage of:		
Loans	0.02 %	0.02 %
Retail loans	0.15 %	0.21 %
Nonaccrual loans	39.33 %	75.58 %
Total nonperforming loans ⁽¹⁾	27.91 %	74.26 %
Adverse assets to capital and allowance for loan losses	3.90 %	4.28 %

⁽¹⁾ Prior period ratio has been updated to conform to current period presentation.

Effective January 1, 2023, the allowance for loan losses is an estimate of expected credit losses in our portfolio. We determine the appropriate level of allowance for loan losses based on a disciplined process and methodology that incorporates expected probabilities of default and severity of loss based on historical portfolio performance, forecasts of future economic conditions, and management's judgment with respect to unique aspects of current and expected conditions that may not be contemplated in historical loss experience or forecasted economic conditions. Prior to January 1, 2023, the allowance for loan losses is an estimate of losses on loans in our portfolio as of the financial statement date.

As a result of adoption of the CECL guidance, the allowance for loan losses decreased by \$9.8 million and was largely due to the requirement of CECL to estimate losses to the assets' contractual maturities, resulting in a decrease of allowances attributable to our short-term portfolios. Partially offsetting the decline was a modest increase in allowance attributable to our long-term real estate portfolio.

As of June 30, 2023, the allowance decreased \$7.3 million, compared to December 31, 2022, primarily due to the adoption of the CECL guidance. While positive shifts in our economic forecasts further reduced the allowance level as of June 30, 2023, this was more than offset by additional reserves for specific nonperforming loans.

Funding, Liquidity and Shareholders' Equity

We are responsible for meeting the District's funding, liquidity and asset/liability management needs. Access to the unsecured debt capital markets remains our primary source of liquidity. We also maintain a secondary source of liquidity through a high-quality investment portfolio and other short-term liquid assets.

The System access to the debt capital markets is critical to support its mission of providing credit to farmers, ranchers and other eligible borrowers. For the six months ended June 30, 2023, investor demand for Systemwide Debt Securities remained sufficient to meet our funding needs.

On August 1, 2023, Fitch Ratings lowered the U.S. sovereign's long-term Issuer Default Rating to AA+ from AAA; the F1+ short-term rating was affirmed. The outlook on the long-term debt rating was revised to stable. On August 2, 2023, Fitch Ratings lowered the long-term debt rating for the Farm Credit System to AA+ from AAA; the A-1+ short-term rating was affirmed. The outlook on the long-term debt rating was revised to stable. As a government-sponsored entity, the Farm Credit System benefits from the implicit government support and, therefore, the ratings are directly linked to the U.S. sovereign rating.

On August 2, 2023, Fitch Ratings lowered the long-term debt rating for the Farm Credit Banks, including AgriBank, to A+ from AA-; the F1+ short-term rating was affirmed. The outlook on the long-term debt rating was revised to stable. The reduction in the credit rating by Fitch Ratings for the Farm Credit Banks, including AgriBank, could result in higher funding costs or disruptions in our access to the capital markets.

Our liquidity policy and FCA regulations require maintaining minimum liquidity on a continuous basis of 120 days and 90 days, respectively. The days of liquidity measurement refers to the number of days that maturing debt is covered by liquid investments and cash. As of June 30, 2023, we had sufficient liquidity to fund all debt maturing within 156 days. At June 30, 2023, we held qualifying assets in excess of each incremental level to meet the liquidity coverage intervals.

We manage interest rate risk under policies established by our board and limits established by our ALCO. These policies and limits ensure that net interest income and economic value of equity at risk remain within the defined risk appetite of the board, including

during periods of high interest rate volatility. Beginning in 2023, we made temporary strategic pricing changes in an effort to combat competitive pressure for District Associations.

Total shareholders' equity at June 30, 2023 was \$7.7 billion, a \$489.0 million increase from December 31, 2022. The increase was driven primarily by net income and net stock issuances reduced by cash patronage distributions declared, consistent with AgriBank's capital plan. Although still in an overall unrealized loss position, unrealized gains during the first quarter in our investment portfolio, paired with unrealized gains in our derivative portfolio during the second quarter, positively impacted equity through the first half of 2023. Based on our analysis, we have not recognized an allowance for credit losses related to our investment portfolio as the majority of our portfolio is guaranteed by the U.S. government or its agencies. Additionally, no investments were impaired as of June 30, 2023.

At June 30, 2023, we exceeded the regulatory minimum capital ratios. Refer to the Additional Regulatory Information section as well as Note 4 in the accompanying Financial Statements for further discussion of capital ratios.

Results of Operations

Net income for the six months ended June 30, 2023 was \$422.4 million, a 15.5 percent increase, compared to \$365.7 million for the same period in 2022. ROA of 54 basis points through the six months ended June 30, 2023 remained above AgriBank's 50 basis point target.

Changes in Significant Components of Net Income

(in thousands)			Increase (decrease) in Net Income
For the six months ended June 30,	2023	2022	
Net interest income	\$467,468	\$398,848	\$68,620
Provision for credit losses	3,000	(5,000)	(8,000)
Non-interest income	50,948	52,480	(1,532)
Non-interest expense	92,995	90,648	(2,347)
Net income	\$422,421	\$365,680	\$56,741

Net interest income

Information regarding the year-to-date average daily balances (ADB) and annualized average rates earned and paid on our portfolio follows:

(in thousands)

For the six months ended June 30,	2023			2022		
	ADB	Rate	NII	ADB	Rate	NII
Interest earning assets:						
Wholesale loans	\$119,873,619	3.31 %	\$1,964,751	\$109,454,827	1.51 %	\$821,706
Retail accrual loans	14,269,004	4.76 %	337,142	13,727,030	3.38 %	230,300
Retail nonaccrual loans	45,002	17.21 %	3,841	49,002	17.07 %	4,149
Investment securities and federal funds	22,851,499	3.77 %	427,170	19,986,071	0.75 %	73,882
Total earning assets	157,039,124	3.51 %	2,732,904	143,216,930	1.59 %	1,130,037
Interest bearing liabilities	150,560,221	3.03 %	2,265,436	136,846,866	1.08 %	731,189
Interest rate spread	\$6,478,903	0.48 %		\$6,370,064	0.51 %	
Impact of equity financing		0.12 %			0.05 %	
Net interest margin		0.60 %			0.56 %	
Net interest income			\$467,468			\$398,848

Net interest income increased mainly due to an increase in the average daily balance of our loan portfolio as well as higher earnings on investment securities as a result of widened credit spreads.

Net interest margin for the six months ended June 30, 2023 increased compared to the same period of the prior year. While spreads compressed across the loan portfolio, the impact of equity financing and investment spread has improved during the first half of 2023. Equity financing represents the benefit of non-interest bearing funding.

Non-interest income

Non-interest income decreased slightly for the six months ended June 30, 2023, compared to the same period of the prior year. As interest rates have risen, fixed-rate loan prepayment and conversion activity has slowed significantly and returned to levels common in a rising interest rate environment, resulting in lower fee income when compared to the same period of the prior year. In 2022, we sold investments resulting in losses and, therefore, other non-interest income (loss) was lower in 2022 as a result of these sales. Additionally offsetting the decrease in non-interest income, mineral income increased for the six months ended June 30, 2023 compared to the same period of the prior year. While oil prices have decreased during the first half of 2023 compared to the same period of 2022, oil and gas production has increased over the same time period.

Non-interest expense

Non-interest expense increased slightly for the six months ended June 30, 2023 compared to the same period of the prior year mainly due to increases in salaries and benefits.

LIBOR Transition

We have exposure to LIBOR, including financial instruments that reference LIBOR, that mature after June 2023. Refer to the AgriBank 2022 Annual Report for further information regarding the cessation of LIBOR and our risk mitigation efforts as a result of this change.

LIBOR-Indexed Variable Rate Financial Instruments

(in thousands)

As of June 30, 2023

Period of Maturity	July 1, 2023 and After
Assets	
Loans	\$37,459
Investments	958,849
Total	\$996,308
Shareholders' equity	
Preferred stock ⁽¹⁾	\$250,000

⁽¹⁾The preferred stock is redeemable in whole or in part, at our option, quarterly beginning January 1, 2024. Dividends accrue at a fixed annual rate of 6.875 percent from the date of issuance through December 31, 2023, and beginning January 1, 2024 will accrue at an annual rate equal to three-month United States Dollar LIBOR rate, reset quarterly, plus 4.225 percent. Since United States Dollar LIBOR as defined with respect to the preferred stock will no longer be available after June 30, 2023, the annual rate will be replaced by a CME Term SOFR-based rate if the preferred stock is not redeemed on January 1, 2024. To the extent that any preferred stock has not been redeemed prior to June 30, 2023, pursuant to the Adjustable Interest Rate (LIBOR) Act and Federal Reserve Board Regulation ZZ, the LIBOR-based rate that would have been paid after December 31, 2023 under such preferred stock will be replaced by operation of law with a CME Term SOFR-based rate. Refer to the AgriBank 2022 Annual Report for additional information about the preferred stock.

(in millions)

Period of Termination	July 1, 2023 and After
Derivatives (notional amount)	\$862

As advantageous opportunities arise, AgriBank has been terminating certain LIBOR-indexed swaps. These terminations are intended to opportunistically lower AgriBank's exposure to LIBOR instruments due to the LIBOR discontinuance. As part of the LIBOR discontinuance, LIBOR-indexed swaps that were cleared at the Chicago Mercantile Exchange (CME) were converted to a short-dated LIBOR swap and a forward-starting SOFR swap. This conversion impacted approximately \$115 million notional of AgriBank's derivatives portfolio. The remaining LIBOR-indexed swaps were modified directly through amendments or through the incorporation of fallback language, which changed the contracts to SOFR after June 30, 2023.

Our exposure to loans indexed to LIBOR does not include wholesale loans, as they are not directly indexed to LIBOR. However, the wholesale pricing terms are generally matched to the District Associations' retail portfolios, which may contain some loans indexed to LIBOR. As such, the wholesale loans have historically been partially funded by LIBOR-indexed bonds. LIBOR-indexed bonds were also used to fund a portion of our administered variable loans to District Associations and, in turn, their customers. With limited exceptions in accordance to FCA guidance, District Associations have ceased issuing new loans indexed to LIBOR. There were approximately \$2 billion of total LIBOR loan exposures at District Associations as of June 30, 2023; however, a majority of this exposure repriced to SOFR on July 1, 2023.

Other Matters

Our approval is required for significant structural changes at District Associations, including, but not limited to, merger, acquisition, liquidation or re-affiliation to another Farm Credit District.

Effective April 1, 2023, two of our District Associations, Farm Credit Midsouth, ACA and Farm Credit Mid-America, ACA, merged and are doing business as Farm Credit Mid-America, ACA, headquartered in Louisville, Kentucky.

In 2021, Delta, ACA's (Delta's) board of directors determined that it was in the best interests of Delta to voluntarily dissolve, and approved a preliminary resolution to proceed with a plan to voluntarily liquidate and dissolve the Association (the Plan). On March 17, 2022, the FCA preliminarily approved the Plan. On April 14, 2022, Delta's stockholders approved the Plan, which included an agreement to sell the loan portfolio to another District Association. Subsequently, on April 19, 2022, the FCA provided final approval of the Plan. The sale of Delta's entire loan portfolio to AgHeritage Farm Credit Services, ACA occurred on May 1, 2022. All Delta employees were terminated effective May 31, 2022. The assets are under the control of a liquidation agent, and the ultimate timing of the final liquidation is uncertain and subject to multiple considerations.

Certification

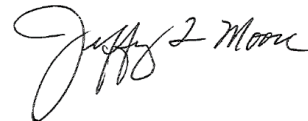

The undersigned have reviewed the June 30, 2023 Quarterly Report of AgriBank, FCB, which has been prepared under the oversight of the Audit Committee and in accordance with all applicable statutory or regulatory requirements. The information contained herein is true, accurate and complete to the best of our knowledge and belief.

Notes to Financial Statements

AgriBank, FCB

(Unaudited)

NOTE 1

Organization and Significant Accounting Policies

AgriBank, FCB (AgriBank) is one of the Banks of the Farm Credit System (the System), a nationwide network of cooperatively owned Banks and Associations, established by Congress and subject to the provisions of the Farm Credit Act of 1971, as amended. The System specializes in providing financing and related services to qualified borrowers for agricultural and rural purposes. AgriBank and its District Associations are collectively referred to as the District. Each parent ACA has wholly owned Federal Land Credit Association and Production Credit Association subsidiaries. AgriBank serves as the intermediary between the financial markets and the retail lending activities of the District Associations.

The accompanying Financial Statements contain all adjustments necessary for a fair presentation of the interim financial condition and results of operations and conform to generally accepted accounting principles in the United States of America (GAAP) and prevailing practices within the financial services industry. The preparation of Financial Statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Financial Statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The Financial Statements include the accounts of AgriBank. The Financial Statements do not include the assets, obligations or results of operations of District Associations or service corporations. AgriBank operates as a single segment for reporting purposes.

Certain amounts in the prior years' Financial Statements have been reclassified to conform to current year presentation.

A description of our organization and operations, significant accounting policies followed, financial condition, and results of operations as of and for the year ended December 31, 2022 are contained in the 2022 Annual Report.

These unaudited second quarter 2023 Financial Statements should be read in conjunction with the 2022 Annual Report. The results for the six months ended June 30, 2023 do not necessarily indicate the results to be expected for the year ending December 31, 2023.

There have been specific changes in our accounting policies as disclosed in our 2022 Annual Report. The updated accounting policies are described as follows:

Effective January 1, 2023, we revised our policy Statements of Cash Flows policy to exclude Federal Funds balances from the beginning and ending cash balances in the Statement of Cash flows. This policy change was applied retroactively and \$921.7 million of Federal Funds was reclassified from the ending balance as of June 30, 2022, and presented as an Investing Activity in the Statement of Cash Flows. The revision of this policy had no impact on the Statements of Condition or Statements of Comprehensive Income. This policy was revised to better conform with industry practice and make our financial statements more comparable to other institutions.

(in thousands)	For the six months ended June 30, 2022		
	As reported	Change	As adjusted
Increase in federal funds sold and securities purchased under resale agreements, net	\$—	\$(921,700)	\$(921,700)
Net cash used in investing activities	(4,163,451)	(921,700)	(5,085,151)
Net (decrease) increase in cash	123,845	(921,700)	(797,855)
Cash at end of period	1,428,839	(921,700)	507,139

Loans: Loans are carried at their principal amount outstanding, net of any unearned income, cumulative net charge-offs and unamortized deferred fees. Loan interest is accrued and credited to interest income based upon the daily principal amount outstanding. Accrued interest on wholesale loans is capitalized to loan principal on a monthly basis. Origination fees, net of related costs, are deferred and recognized over the life of the loan as a yield adjustment in net interest income. The net amount of loan fees and related origination costs are not material to the Financial Statements taken as a whole. The majority of our loan-related fees are through funding our wholesale loans. These fees are considered funding charges, because the fees are related to actions of the underlying Association retail loans, which are funded through the wholesale loans. These wholesale fees are not subject to deferral and are recognized in the period in which they are assessed.

A loan is considered contractually past due when any principal repayment or interest payment required by the loan instrument is not received on or before the due date. A loan remains contractually past due until it is modified or until the entire amount past due, including principal, accrued interest and penalty interest incurred as the result of past due status, is collected or otherwise discharged in full.

Loans are placed in nonaccrual status when principal or interest is delinquent for 90 days or more (unless adequately secured and in the process of collection) or circumstances indicate that full collection is not expected. When a loan is placed in nonaccrual status, and the interest is determined to be both uncollectible and the loss is known, we reverse current year accrued interest to the extent principal plus accrued interest exceeds the net realizable value of the collateral prior to reclassification. When we deem a loan to be uncollectible, we charge the loan principal and prior year(s) accrued interest against the allowance for loan losses. Subsequent recoveries, if any, are added to the allowance for loan losses. Any cash received on nonaccrual loans is applied to reduce the recorded investment in the loan, except in those cases where the collection of the recorded investment is fully expected and certain other criteria are met. In these circumstances interest is credited to income when cash is received. Loans are charged off at the time they are determined to be uncollectible. Nonaccrual loans may be returned to accrual status when principal and interest are current, the customer's ability to fulfill the contractual payment terms is fully expected, and, if the loan was past due when placed in nonaccrual status, the loan has evidence of sustained performance in making on-time contractual payments (typically based on payment frequency).

Loan modifications may be granted to borrowers experiencing financial difficulty. Qualifying disclosable modifications are one or a combination of principal forgiveness, interest rate reduction, or a term or payment extension. Covenant waivers and modifications of contingent acceleration clauses are not considered term extensions.

Prior to January 1, 2023, in situations where, for economic or legal reasons related to the borrower's financial difficulties, we granted a concession for other than an insignificant period of time to the borrower that we would not otherwise consider, the related loan was classified as a troubled debt restructuring (TDR), also known as a formally restructured loan for regulatory purposes. A concession was generally granted in order to minimize economic loss and avoid foreclosure. Concessions varied by program and borrower and may have included interest rate reductions, term extensions, payment deferrals, or an acceptance of additional collateral in lieu of payments. In limited circumstances, principal may have been forgiven. Loans classified as TDRs were considered risk loans (as defined in the Allowance for Loan Losses section). There may have been modifications made in the normal course of business that were not considered TDRs.

Allowance for Credit Losses: Effective January 1, 2023, we adopted Accounting Standards Update (ASU) 2016-13 “Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments.” This guidance established a single allowance framework for all financial assets measured at amortized cost and certain off-balance sheet credit exposures, and replaced the incurred loss guidance. This framework requires that management’s estimate reflects credit losses over the assets’ remaining expected life and considers expected future changes in macroeconomic conditions and is referred to as the Current Expected Credit Loss (CECL) model. The allowance for credit losses comprises the allowance for credit losses on loans, unfunded commitments and investment securities.

Allowance for Credit Losses on Loans

Beginning January 1, 2023, the allowance for credit losses on loans (ACL) represents the estimated current expected credit losses on the loan portfolio, over the remaining contractual life of the loan portfolio, adjusted for expected prepayments, and expected utilization of unfunded commitments. The ACL takes into consideration relevant information about past events, current conditions, and reasonable and supportable macroeconomic forecasts of future conditions. The contractual term excludes expected extensions, renewals and modifications unless the extension or renewal options are not unconditionally cancellable.

The ACL is increased through provisions for loan losses and loan recoveries and is decreased through loan loss reversals and loan charge-offs. The provision activity is included as part of the “Provision for Credit Losses” in the Consolidated Statement of Comprehensive Income. See Note 2 Loans and allowance for loan losses for further information.

Determining the appropriateness of the allowance is complex and requires judgment by management about the effect of matters that are inherently uncertain. Subsequent evaluations of the then-existing loan portfolio, in light of the factors then prevailing, may result in significant changes in the ACL in those future periods. Loans are evaluated on the amortized cost basis, including unamortized premiums and discounts. We utilize a single economic scenario over a reasonable and supportable forecast period of three years. Subsequent to the forecast period, we revert to historical loss experience to inform the estimate of losses for the remaining estimated contractual life of the portfolio.

The economic forecasts are updated on a quarterly basis and include macroeconomic variables such as net farm income, unemployment rates, real gross domestic product levels, housing price index, and agricultural land values. Loan and borrower characteristics are also utilized and include internal risk ratings, delinquency status, and the remaining term of the loan, adjusted for expected prepayments. We also consider the imprecision inherent in the process and methodology, which may lead to a management adjustment to the modeled ACL results. Expected credit loss estimates also include consideration of expected cash recoveries on loans previously charged off or expected recoveries on collateral dependent loans where recovery is expected through sale of the collateral.

We employ a disciplined process and methodology to establish the ACL that has two basic components: first, an asset-specific component involving individual loans that do not share risk characteristics with other loans and the measurement of expected credit losses for such individual loans; and second, a pooled component for estimated expected credit losses for pools of loans that share similar risk characteristics. When a loan does not share risk characteristics with other loans, expected credit loss is measured as the difference between the amortized cost basis in the loan and the present value of expected future cash flows discounted at the loan’s effective interest rate except that, for collateral-dependent loans, credit loss is measured as the difference between the amortized cost basis in the loan and the fair value of the underlying collateral. The fair value of the collateral is adjusted for the estimated cost to sell if repayment or satisfaction of a loan is dependent on the sale (rather than only on the operation) of the collateral. In accordance with our appraisal policy, the fair value of collateral-dependent loans is based upon independent third-party appraisals or on collateral valuations prepared by in-house appraisers. When an updated appraisal or collateral valuation is received, management reassesses the need for adjustments to the loan’s expected credit loss measurements and, where appropriate, records an adjustment. If the calculated expected credit loss is determined to be permanent, fixed or non-recoverable, the credit loss portion of the loan will be charged off against the ACL.

In estimating the component of the ACL that share common risk characteristics, loans are pooled and segregated into loan classes based on loan type, commodity, and internal risk rating. The model calculates an expected life-of-loan loss percentage for each loan category by considering the probability of default, based on the migration of loans from performing to loss by internal risk rating, and the severity of loss, based on the aggregate net lifetime losses incurred.

The final credit loss estimate also considers factors not reflected in the economic forecast and historical loss experience due to the unique aspects of current conditions and expectations. These factors may include, but are not limited to: lending policies and procedures, experience and depth of lending staff, credit quality and delinquency trends, individual borrower and industry concentrations, national, regional, and local economic business conditions and developments, collateral value trends, and expected performance of specific industry sectors not reflected in the economic forecast.

Prior to January 1, 2023, the allowance for loan losses was an estimate of losses inherent in our loan portfolio as of the financial statement date. We determined the appropriate level of allowance for loan losses based on periodic evaluation of factors such as loan loss history, estimated probability of default, estimated loss severity, portfolio quality, and current economic and environmental conditions. Refer to our 2022 Annual Report for additional information.

Allowance for Credit Losses on Unfunded Commitments

We evaluate the need for an allowance for credit losses on unfunded commitments under CECL, which is included in "Other liabilities" in the Consolidated Statement of Condition. The related provision is included as part of the "Provision for Credit Losses" in the Consolidated Statement of Comprehensive Income. The amount of expected losses is determined by calculating a commitment usage factor over the contractual period for exposures that are not unconditionally cancellable by the institution and applying the loss factors used in the ACLL methodology to the results of the usage calculation. No allowance for credit losses is recorded for commitments that are unconditionally cancellable.

Accrued Interest Receivable: Accrued interest on loans and investment securities is classified separately in the Statements of Condition. Additionally, accrued interest receivable has been excluded from the footnote disclosures for all periods after January 1, 2023.

Securities Purchased Under Resale Agreements: Securities purchased under resale agreements, as included on the Financial Statements, represent collateralized transactions whereby we place cash with a counterparty and receive an equivalent amount of U.S. Treasury securities as collateral, plus interest. These transactions typically represent an overnight investment.

Statements of Cash Flows: For purposes of reporting cash flows, beginning and ending cash balances include cash on hand, deposits at banks and money market funds. Cash flows on hedges are classified in the same category as the items being hedged.

Investment Securities: Effective January 1, 2023, we adopted CECL, which amended the previous other-than-temporary impairment (OTTI) model for investment securities to incorporate an allowance for expected credit losses on investments.

Our investment securities have been classified as available-for-sale (AFS). These investments are reported at fair value, net of allowance for credit losses on investments. Unrealized holding gains and losses on investments are netted and reported as a separate component of shareholders' equity ("Accumulated other comprehensive loss"). Changes in the fair value of investment securities are reflected as direct charges or credits to "Other comprehensive income (loss)," net of allowance for credit losses or impairment. Purchased premiums and discounts are amortized or accreted using the interest method over the terms of the respective securities.

Quarterly we evaluate the investment portfolio for credit losses and impairment. Unrealized losses on our investment portfolio may be driven by a number factors, including but not limited to, changes in interest rates and credit spreads. Additionally, we consider explicit or implicit guarantees provided by the U.S. government. For those securities guaranteed by the U.S. government or agencies, we have not recognized an allowance for credit losses on investments as our expectation of nonpayment of the amortized cost basis, based on historical losses, is zero.

For investment securities where the fair value is less than the amortized cost basis, we recognize impairment in earnings if we have the intent to sell the security or if it is more likely than not that we will be required to sell the security before recovery of its amortized cost basis.

For investment securities not deemed impaired, where fair value is less than the amortized cost basis, we recognize an allowance for credit losses on investment securities, to the extent the unrealized loss is due to credit loss. The final credit loss estimate is subject to management judgment with respect to current and forecasted conditions, and consideration of U.S. government guarantees.

Recently Issued or Adopted Accounting Pronouncements

We have assessed the potential impact of accounting standards that have been issued by the Financial Accounting Standards Board (FASB) and have determined the following standards to be applicable to our business:

Standard and effective date	Description	Adoption status and financial statement impact
In June 2016, the FASB issued ASU 2016-13 "Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments." The guidance is effective for non-U.S. Securities Exchange Commission filers for our first quarter of 2021. In November 2019, the FASB issued ASU 2019-10 which was amended the mandatory effective date for this guidance for certain institutions. We qualified for the deferral of the mandatory effective date. As a result of the change, the standard is effective for our first quarter of 2023 and early adoption was permitted.	The guidance replaced the current incurred loss impairment methodology with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. Credit losses relating to available-for-sale securities would also be recorded through an allowance for credit losses.	We adopted the standard and subsequently issued updates as of January 1, 2023. As a result of adopting this guidance, the allowance for loan losses decreased by \$9.8 million, and the reserve for unfunded commitments increased by \$1.0 million, with a cumulative-effect increase to retained earnings of \$8.8 million. The adoption of the standard did not have a material impact related to our AFS investment portfolio, as the substantial majority of these investments carry a full faith and credit guarantee of the U.S. government or an implicit credit guarantee from its agencies and have an immaterial risk of credit loss. No allowance for credit losses was recognized in relation to our investment portfolio upon adoption.
In April 2019, the FASB issued ASU 2019-04 "Codification Improvements to Topic 326, Financial Instruments—Credit Losses, Topic 815, Derivatives and Hedging, and Topic 825, Financial Instruments." The guidance is effective the same as the effective dates and transition requirements in Update 2016-13 as amended.	The FASB decided to issue a separate Update for improvements to Updates 2016-01, 2016-13, and 2017-12 to increase stakeholders' awareness of the amendments and to expedite improvements to the Codification. The amendments in this Update are intended to improve the Codification or correcting its unintended application. The items addressed in the amendments generally are not expected to have a significant effect on current accounting practice or to create a significant administrative cost for most entities.	We adopted the portion of the guidance relevant to us concurrent with the adoption of ASU 2016-13 as amended on January 1, 2023. The accounting standard update and the amendments did not have a material impact on our financial statements.
In March 2022, the FASB issued ASU 2022-02 "Financial Instruments—Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosures." The guidance was effective at the same time that ASU 2016-13 is adopted.	This guidance eliminated the accounting guidance for troubled debt restructurings by creditors in Subtopic 310-40, Receivables—Troubled Debt Restructurings by Creditors, while enhancing disclosure requirements for certain loan refinancings and restructurings. This guidance also required that an entity disclose current-period gross write-offs by year of origination for financing receivables and net investments in leases within the scope of Subtopic 326-20, Financial Instruments—Credit Losses—Measured at Amortized Cost.	We adopted the standard on January 1, 2023. The adoption of this guidance did not have a material impact on our financial statements, but modified certain disclosures beginning with our first quarter 2023 Quarterly Report.

Total loans	\$138,027,566	100.0 %	\$133,470,781	100.0 %

The Other category was primarily composed of agribusiness and rural residential real estate loans.

Accrued interest receivable on loans of \$1.2 billion as of June 30, 2023 has been excluded from the amortized cost of loans and reported separately in the Statement of Condition.

Participations

We may purchase participations from and sell participations to others, primarily District Associations. We had no purchases outside the System in the periods presented.

Retail Loan Participations Purchased

(in thousands)	June 30, 2023	December 31, 2022
Real estate mortgage	\$5,083,480	\$4,710,046

Other	1,660,441	1,445,398
Total loans	\$14,773,936	\$14,049,512

Portfolio Performance

The primary credit quality indicator we use is the Farm Credit Administration (FCA) Uniform Loan Classification System, which categorizes loans into five categories. The categories are defined as follows:

- Acceptable – assets are non-criticized assets representing the highest quality. They are expected to be fully collectible. This category is further differentiated into various probability of default ratings.
- Other Assets Especially Mentioned (Special mention) – are currently collectible, but exhibit some potential weakness. These assets involve increased credit risk, but not to the point of justifying a substandard classification.
- Substandard – assets exhibit some serious weakness in repayment capacity, equity and/or collateral pledged on the loan
- Doubtful – assets exhibit similar weaknesses as substandard assets. However, doubtful assets have additional weaknesses in existing factors, conditions and values that make collection in full highly questionable.
- Loss – assets are considered uncollectible

We had no loans categorized as loss at June 30, 2023 or December 31, 2022.

Credit Quality of Loans as a Percentage of Total Loans

Real estate mortgage	\$13,357	\$13,055
Production and intermediate-term	36,439	27,296
Other	12,409	1,643
Total nonaccrual loans	\$62,205	\$41,994

Additional Nonaccrual Loans Information

	As of June 30, 2023	For the six months ended June 30, 2023
	Amortized Cost without Allowance	Interest Income Recognized
Nonaccrual loans:		
Real estate mortgage	\$13,325	\$1,460
Production and intermediate-term	14,922	2,382
Other	4,932	—
Total	\$33,179	\$3,842

We had no wholesale loans classified as nonaccrual at June 30, 2023. Reversals of interest income on loans that moved to nonaccrual status were not significant during the six months ended June 30, 2023.

Modifications Granted to Borrowers Experiencing Financial Difficulty

Included within our loans are loan modifications. Loan modifications may be granted to borrowers experiencing financial difficulty. Qualifying disclosable modifications are one or a combination of principal forgiveness, interest rate reduction, or a term or payment extension. Covenant waivers and modifications of contingent acceleration clauses are not considered term extensions. Our loans classified as modified loans and activity on these loans were not material during the six months ended June 30, 2023. We did not have any material commitments to lend to borrowers whose loans have been modified during the six months ended June 30, 2023.

Allowance for Loan Losses and Credit Losses on Unfunded Commitments

The "Provision for credit losses" in the Statements of Comprehensive Income includes a reversal of loan losses and includes any provision for unfunded commitments. The accrued credit losses on unfunded commitments are recorded in "Other liabilities" in the Statements of Condition. Typically, accrued credit losses are relieved and replaced with an allowance for loan loss as the related commitments are funded. The allowance for credit losses on unfunded commitments was not significant as of June 30, 2023 or December 31, 2022. Similarly, the provision for unfunded commitments for the six months ended June 30, 2023 and 2022, was not significant.

⁽¹⁾ The recorded investment in the receivable is the face amount increased or decreased by applicable accrued interest and unamortized premium, discount, finance charges and acquisition costs and may also reflect a previous direct write-down of the investment. The recorded investment may be less than the unpaid principal balance as payments on non-cash basis nonaccrual loans reduce the recorded investment.

⁽²⁾ Unpaid principal balance represents the contractual principal balance of the loan.

We did not have material loan commitments to borrowers whose loans were at risk as of December 31, 2022.

Troubled Debt Restructurings

Prior to the adoption of CECL, included within our loans were troubled debt restructurings (TDRs). These loans had been modified by granting a concession when a borrower is experiencing financial difficulties. There may have been modifications made in the normal course of business that would not be considered TDRs. All risk loans, including TDRs, were analyzed within our allowance for loan losses. Modifications may have include interest rate reduction below market, deferral of principal, interest compromise, principal compromise or extension of maturity. Our loans classified as TDRs and activity on these loans were not material during six months ended June 30, 2022. We did not have any material commitments to lend to borrowers whose loans have been modified as TDRs as of June 30, 2022.

NOTE 3

Investment Securities

All investment securities are classified as available-for-sale (AFS).

Total	\$9,293,162	\$219,502	\$7,538,087	\$706,873

We sold \$893.8 million of U.S. Treasury securities during six months ended June 30, 2022. There were no AFS investment securities sold during the the six months ended June 30, 2023.

Based on our analysis, we have not recognized an allowance for credit losses related to our investment portfolio as of June 30, 2023. This is due to the fact that a substantial majority of our portfolio is guaranteed by the U.S. government or its agencies. Additionally, no investments were impaired as of June 30, 2023.

Prior to 2023, we evaluated our investment securities for other-than-temporary impairment (OTTI) on a quarterly basis. We determined no securities were in an OTTI loss position at December 31, 2022. There was no OTTI activity during any period in 2022.

NOTE 4

Shareholders' Equity

Regulatory Capital Requirements and Ratios

	June 30, 2023	December 31, 2022	Regulatory Minimums	Capital Conservation Buffer	Total
Risk-adjusted:					
Common equity tier 1 capital ratio	16.8 %	16.3 %	4.5 %	2.5 %	7.0 %
Tier 1 capital ratio	17.3 %	16.9 %	6.0 %	2.5 %	8.5 %
Total capital ratio	17.4 %	16.9 %	8.0 %	2.5 %	10.5 %
Permanent capital ratio	17.3 %	16.9 %	7.0 %	— %	7.0 %
Non-risk-adjusted:					
Tier 1 leverage ratio	5.2 %	5.2 %	4.0 %	1.0 %	5.0 %
UREE ⁽¹⁾ leverage	2.0 %	2.3 %	1.5 %	— %	1.5 %

⁽¹⁾Unallocated retained earnings and equivalents

If the capital ratios fall below the total requirements, including the buffer amounts, capital distributions (equity redemptions, dividends and patronage) and discretionary senior executive bonuses are restricted or prohibited without prior FCA approval. Protected participation certificates of \$70 thousand were included in Capital Stock and Participation Certificates on the Statements of Changes in Shareholders' Equity as of June 30, 2023 and December 31, 2022.

NOTE 5

Employee Benefit Plans

We participate in Districtwide employee benefit plans. The funded status of the post-employment benefit plans is recorded at the District level.

District Components of Net Periodic Benefit Cost

(in thousands) For the six months ended June 30,	Pension Benefits		Other Benefits	
	2023	2022	2023	2022
Net periodic benefit cost:				
Service cost	\$10,952	\$13,253	\$61	\$90
Interest cost	30,984	18,102	382	229
Expected return on plan assets	(34,877)	(33,398)	—	—
Amortization of prior service credit	(1,387)	(1,380)	—	—
Amortization of net loss (gain)	27,396	24,158	(794)	(438)
Other cost	—	1,163	—	—
Net periodic benefit cost	\$33,068	\$21,898	\$(351)	\$(119)

Certain employees in the AgriBank District participate in the AgriBank District Retirement Plan, a governmental defined benefit retirement plan. The employers contribute amounts in accordance with the governing body's funding policy to provide the plan with sufficient assets to meet the benefits to be paid to participants. Refer to the 2022 Annual Report for a more complete description of the Employee Benefit Plans.

For the six months ended June 30, 2023, District employers have contributed \$26.3 million to fund pension benefits. District employers anticipate contributing an additional \$22.6 million to fund pension benefits in 2023. The Plan Sponsor Committee of the AgriBank District Retirement Plan determines the funding frequency of the plan. The Nonqualified Pension plan is funded as benefits are paid.

NOTE 6

Commitments and Contingencies

In the normal course of business, we have various contingent liabilities and commitments outstanding, primarily commitments to extend credit, which may not be reflected in the Financial Statements. We do not anticipate any material losses because of the contingencies or commitments.

From time to time, we may be named as defendants in certain lawsuits or legal actions in the normal course of business. At the date of these Financial Statements, our management team was not aware of any material actions. However, management cannot ensure that such actions or other contingencies will not arise in the future.

While we are primarily liable for our portion of Systemwide bonds and notes, we are jointly and severally liable for the Systemwide bonds and notes of the other System Banks. The total bonds and notes of the System at June 30, 2023 was \$396.3 billion.

NOTE 7

Fair Value Measurements

We use fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Assets and liabilities measured at fair value on a recurring and non-recurring basis consist of federal funds, securities purchased under resale agreements, investments available-for-sale, derivative assets and liabilities, certain loans, other property owned, and collateral assets and liabilities. The fair value is also calculated and disclosed for other financial instruments that are not measured at fair value on the Statements of Condition. These other financial instruments consist of cash, loans, bonds, and notes and commitments to extend credit and letters of credit. Refer to the 2022 Annual Report for descriptions of the valuation methodologies we use for asset and liabilities recorded at fair value on a recurring or non-recurring basis and for estimating fair value for financial instruments not recorded at fair value.

A fair value hierarchy is used for disclosure of fair value measurements to maximize the use of observable inputs. The valuation hierarchy is based on the transparency of inputs to the valuation of an asset or liability as of the measurement date. A financial instrument's categorization within the valuation hierarchy is based on the lowest level of input that is significant to the fair value measurement. Refer to the 2022 Annual Report for a more complete description of these input levels.

Total liabilities	\$7,280	\$85,784	\$—	\$93,064

We had no level 3 assets measured at fair value on a recurring basis at June 30, 2023 or December 31, 2022.

Non-recurring Measurements

Certain loans are individually evaluated for credit losses and are deemed to be collateral dependent. The carrying value amount of these loans is based on the estimated value of the underlying collateral, less costs to sell. When the fair value of the collateral, less costs to sell, is less than the amortized cost basis of the loan, a specific allowance for expected credit losses is established. Costs to sell represent transaction costs and are not included as a component of the collateral's estimated fair value. Typically, the process

requires significant input based on management's knowledge of and judgment about current market conditions, specific issues relating to the collateral and other matters and, therefore, are classified as Level 3 fair value measurements.

We had \$16.2 million and \$21.4 million of collateral dependent loans measured at fair value on a non-recurring basis at June 30, 2023 and December 31, 2022, respectively.

NOTE 8

Derivative and Hedging Activity

Use of Derivatives

We maintain an overall interest rate risk management strategy that incorporates the use of derivative products to minimize significant unplanned fluctuations in earnings that are caused by interest rate volatility. Our goals are to manage interest rate sensitivity by modifying the repricing or maturity characteristics of certain balance sheet assets and liabilities so that movements in interest rates do not adversely affect net interest margin. As a result of interest rate fluctuations, fixed-rate liabilities will appreciate or depreciate in market value. The effect of this unrealized appreciation or depreciation is expected to be substantially offset by our gains or losses on the derivative instruments that are linked to fixed-rate liabilities. Another result of interest rate fluctuations is that the interest expense of floating-rate liabilities will increase or decrease. The effect of this variability in earnings is expected to be substantially offset by our gains and losses on the derivative instruments that are linked to these floating-rate liabilities. We consider the use of derivatives to be a prudent method of managing interest rate sensitivity, as it prevents earnings from being exposed to undue risk posed by changes in interest rates.

All of our derivative activities are monitored by the Asset/Liability Committee (ALCO) as part of the committee's oversight of our asset/liability and treasury functions. ALCO ensures that the Bank's derivative hedging strategies are implemented in line with the board's risk appetite and are incorporated into our overall asset/liability risk-management framework.

Interest Rate Risk Management

We primarily enter into derivative transactions, particularly interest rate swaps, to reduce funding costs, improve liquidity and manage interest rate sensitivity. Interest rate swaps allow us to change the characteristics of fixed- or floating-rate debt we issue by swapping to a synthetic fixed or floating rate lower than those available to us if borrowings were made directly. Under interest rate swap arrangements, we agree with other parties to exchange, at specified intervals, payment streams calculated on a specified notional principal amount, with at least one stream based on a specified floating-rate index.

Other Derivative Uses

Other uses for derivatives are as follows:

- We also facilitate interest rate swaps to qualified borrowers of the District Associations. These swaps allow qualified borrowers to manage their interest rate risk and lock in a fixed interest rate similar to a fixed-rate loan. We manage the interest rate risk from customer swaps with the execution of offsetting interest rate swap transactions.
- We may utilize commodity derivative instruments to manage mineral income volatility. We may purchase commodity put options to protect against a decline in oil prices, which could significantly impact our mineral income. We had put option contracts with a total notional of 110 thousand barrels of oil as of December 31, 2022, which are not included in the table below. There were no commodity derivative instruments outstanding as of June 30, 2023.

Derivative Instruments Activity (in notional amount)

(in millions)	Receive-Fixed Swaps	Pay-Fixed Swaps	Floating-for-Floating	Other Derivatives	Total
As of December 31, 2021	\$900	\$5,542	\$1,400	\$142	\$7,984

As of June 30, 2023	\$4,776	\$5,087	\$1,150	\$116	\$11,129

Other Derivatives consisted of retail customer derivative products.

Credit Risk Management

By using derivative instruments, we are subject to credit and market risk. If a counterparty is unable to perform under a derivative contract, our credit risk equals the net amount due to us. Generally, when the fair value of a derivative contract is positive, we have credit exposure to the counterparty, creating credit risk for us. When the fair value of the derivative contract is negative, we do not have credit exposure.

With the exception of retail customer swaps, to minimize the risk of credit losses, we deal only with counterparties that have an investment-grade or better credit rating from a rating agency, and we monitor the credit standing and levels of exposure to individual counterparties. As of June 30, 2023, we do not anticipate nonperformance by any of these counterparties. We typically enter into master agreements that contain netting provisions. These provisions allow us to require the net settlement of covered contracts with the same counterparty in the event of default by the counterparty on one or more contracts. All such derivative contracts are supported by bilateral collateral agreements with counterparties requiring collateral to be posted in the event certain dollar thresholds of exposure of one party to the other are reached. These thresholds vary depending on the counterparty's current credit rating.

Bilateral Derivatives

(in thousands)	June 30, 2023	December 31, 2022
Notional amount ⁽¹⁾	\$1,716,804	\$4,370,313
Cash collateral posted by counterparties	(6,010)	(7,280)
Securities posted by counterparties	(3,817)	(4,714)
Total collateral posted by counterparties, net	<u><u>\$(9,827)</u></u>	<u><u>\$(11,994)</u></u>

⁽¹⁾ Excludes notional amount for commodity hedges

We also clear derivative transactions through a futures commission merchant (FCM) with a clearinghouse or a central counterparty (CCP). When the swap is cleared by the two parties, the single bilateral swap is divided into two separate swaps with the CCP becoming the counterparty to both of the initial parties to the swap. CCPs have several layers of protection against default including margin, member capital contributions and FCM guarantees of their customers' transactions with the CCP. FCMs also pre-qualify the counterparties to all swaps that are sent to the CCP from a credit perspective, setting limits for each counterparty and collecting initial and variation margin daily from each counterparty for changes in the value of cleared derivatives. The margin collected from both parties to the swap protects against credit risk in the event a counterparty defaults. The initial and variation margin requirements are set by and held for the benefit of the CCP. Additional initial margin may be required and held by the FCM, due to its guarantees of its customers' trades with the CCP. Typically, daily variation margin payments are recognized as settlements rather than collateral posted. Initial margin requirements consider volume of notional outstanding, duration of outstanding derivatives and market volatility.

Centrally Cleared Derivatives

(in thousands)	June 30, 2023	December 31, 2022
Notional Amount	\$9,411,804	\$7,940,313
Initial margin posted with counterparties	\$92,304	\$56,504

Accounting for Derivatives

Fair Value Hedges: For derivative instruments that are designated and qualify as a fair value hedge, the gain or loss on the derivative as well as the offsetting gain or loss on the hedged item attributable to the hedged risk are recognized in current earnings. We include the gain or loss on the derivative in the same line item ("Interest expense") on the Statements of Comprehensive Income as the offsetting gain or loss on the related hedged item.

Cash Flow Hedges: For derivative instruments that are designated and qualify as a cash flow hedge, the gain or loss on the derivative is reported as a component of "Other comprehensive income (loss)" until earnings are affected by the variability of the cash flows of the hedged transaction. When reclassified to earnings, we include the gain or loss on the derivative in the "Interest expense" line item on the Statements of Comprehensive Income.

Derivatives not Designated as Hedges: For derivatives not designated as a hedging instrument, the related change in fair value is recorded in current period earnings in "Other non-interest (loss) income, net" on the Statements of Comprehensive Income.

Financial Statement Impact of Derivatives

The fair value of our derivative contracts are presented as "Derivative assets" and "Derivative liabilities" on the Statements of Condition.

(in thousands)	June 30, 2023		December 31, 2022	
	Fair Value	Fair Value	Fair Value	Fair Value
	Assets	Liabilities	Assets	Liabilities
Derivatives designated as hedging instruments:				
Receive-fixed swaps	\$355	\$76,356	\$—	\$72,410
Pay-fixed swaps	120,789	5,125	99,449	2,927
Floating-for-floating swaps	12,888	—	15,743	45
Total derivatives designated as hedging instruments	134,032	81,481	115,192	75,382
Derivatives not designated as hedging instruments:				
Pay-fixed swaps	11,429	—	11,612	—
Other derivative products	—	10,342	29	10,402
Total derivatives not designated as hedging instruments	11,429	10,342	11,641	10,402
Variation margin settled	(30,510)	—	(12,019)	—
Credit valuation adjustments	(190)	—	(232)	—
Total gross amounts of derivatives	\$114,761	\$91,823	\$114,582	\$85,784

(in thousands)	June 30, 2023	December 31, 2022
Derivative assets	\$114,761	\$114,582
Derivative liabilities	(91,823)	(85,784)
Accrued interest payable on derivatives, net	(1,033)	(733)
Gross amounts not offset in Statements of Condition:		
Cash collateral posted by counterparties	(6,010)	(7,280)
Cash collateral posted with counterparties	92,304	56,504
Securities posted as collateral pledged by counterparties	(3,817)	(4,714)
Net exposure amounts	\$104,382	\$72,575

The fair value of derivatives includes a credit valuation adjustment (CVA). The CVA reflects credit risk of each derivative counterparty to which we have exposure, net of any collateral posted by the counterparty, and an adjustment for our credit worthiness where the counterparty has exposure to us. The CVA was not material in any of the periods presented. The change in the CVA for the period is included in "Interest expense" on the Statements of Comprehensive Income.

In relation to our cash flow hedges, the following table presents the amount of other comprehensive income (OCI) recognized on derivatives and the amount reclassified from accumulated other comprehensive income (AOCI) into earnings on effective cash flow hedges. During the next 12 months, \$53.1 million of net gains in AOCI on derivative instruments that qualified as cash flow hedges are expected to be reclassified into earnings.

Balance at June 30, 2023	\$(834,361)	\$85,517	\$(1,604)	\$(750,448)

The derivatives and hedging activity and employee benefit activity reclassified from AOCI is included in "Interest expense" and "Other operating expenses" respectively, on the Statements of Comprehensive Income. Investments activity reclassified from AOCI is included in "Other non-interest income, net" on the Statements of Comprehensive Income.

NOTE 10

Subsequent Events

We have evaluated subsequent events through August 9, 2023, which is the date the Financial Statements were available to be issued. There have been no material subsequent events that would require recognition in the Quarterly Financial Statements or disclosure in the Notes to those Financial Statements.

NOTE 11

AgriBank and District Associations

The accompanying Financial Statements exclude financial information of District Associations. AgriBank and District Associations are collectively referred to as the “District.” We separately publish certain unaudited combined AgriBank District financial information, including a condensed statement of condition and statement of income, which can be found on our website at www.AgriBank.com.

Effective April 1, 2023, two of our District Associations, Farm Credit Midsouth, ACA and Farm Credit Mid-America, ACA, merged and are doing business as Farm Credit Mid-America, ACA, headquartered in Louisville, Kentucky.

Additional Regulatory Information

AgriBank, FCB

(Unaudited)

Regulatory Capital Disclosures

The following information contains quarterly regulatory disclosures as required under FCA Regulations 628.62 and 628.63 for risk-adjusted ratios, common equity tier 1, tier 1 capital and total capital ratios. Refer to Note 4 of the accompanying Financial Statements for information regarding the statutorily required permanent capital ratio. These disclosures should be read in conjunction with our 2022 Annual Report, which includes additional qualitative disclosures. Unless otherwise noted, there have been no material changes to the qualitative disclosures contained in the 2022 Annual Report. As required by FCA regulations, these disclosures, including regulatory capital ratios, are made available for at least three years and can be accessed in our financial reports at www.AgriBank.com.

The following table summarizes the interim disclosure requirements and indicates where each matter is disclosed in this quarterly report.

Disclosure Requirement	Description	Second Quarter 2023 Report Reference
Scope of Application	Corporate entity and consolidated subsidiaries	42
Capital Structure	Regulatory capital components	42
Capital Adequacy	Risk-weighted assets Regulatory capital ratios	43
Capital Buffers	Quantitative disclosures	43
Credit Risk	Summary of exposures Geographic distribution Additional industry and counterparty distribution Contractual maturity Impaired loans and allowance for credit losses	44-45
Counterparty Credit Risk-Related Exposures	Counterparty exposures	46
Credit Risk Mitigation	Exposures with reduced capital requirements	46
Securitization	Securitization exposures	46-47
Equities	Equity exposures	47
Interest Rate Risk for Non-trading Activities	Interest rate sensitivity	47-48

Scope of Application

AgriBank is primarily owned by Farm Credit Associations (District Associations). District Associations are composed of Agricultural Credit Associations, each of which has wholly owned Farm Land Credit Association and Production Credit Association subsidiaries. AgriBank is the primary funding source for all District Associations. AgriBank has no subsidiaries; therefore, the Financial Statements are only those of AgriBank and are not consolidated with any other entity.

Capital Structure

Regulatory Capital Structure

(in thousands)	3-month Average Daily Balance
As of June 30, 2023	
Common Equity Tier 1 Capital (CET1)	
Common Cooperative Equities:

Regulatory adjustments and deductions made to total capital	—
Total tier 2 capital	<u>20,705</u>
Total Capital	<u><u>\$8,325,860</u></u>

⁽¹⁾ Adjusted allowance for credit losses includes the allowance for credit losses on loans and reserves for credit losses on unfunded commitments.

Capital Adequacy and Capital Buffers

Risk-Weighted Assets

(Risk-weighted 3-month average daily balance in thousands)

As of June 30, 2023

Exposures to:	
Sovereign entities	\$—
Foreign bank entities	561,230
Government-sponsored enterprises ⁽¹⁾	25,770,773
Depository institutions and credit unions ⁽²⁾	55,877
Public sector entities	—
Corporate, including borrower loans	19,664,837
Residential mortgage	1,287,853
Past due and nonaccrual	117,880
Securitization exposures	230,574
Cleared transactions	627
Unsettled transactions	—
All other assets	229,742
Deductions:	
Regulatory adjustments and deductions made to CET1	10,598
Regulatory adjustments and deductions made to AT1 ⁽³⁾	—
Regulatory adjustments and deductions made to T2 ⁽⁴⁾	—
Total standardized risk-weighted assets	\$47,908,795

⁽¹⁾ Includes exposures to Farm Credit System entities

⁽²⁾ Includes exposures to Loans to other financing institutions (OFIs) that are risk-weighted as U.S. depository institutions and credit unions

⁽³⁾ AT1 capital is additional tier 1 capital

⁽⁴⁾ T2 is tier 2 capital

As of June 30, 2023, the Bank was well-capitalized and exceeded all capital requirements to which it was subject, including applicable capital buffers. Because capital exceeded the buffer requirements, the Bank currently has no limitations on its distributions and discretionary bonus payments. The aggregate amount of eligible retained income, as regulatorily calculated, was \$874.8 million as of June 30, 2023.

Regulatory Capital Requirements and Ratios

	Regulatory	Required	As of	Calculated
	Minimums	Buffer	June 30, 2023	Buffer
Common equity tier 1 capital ratio	4.5 %	2.5 %	16.8 %	12.3 %
Tier 1 capital ratio	6.0 %	2.5 %	17.3 %	11.3 %
Total capital ratio	8.0 %	2.5 %	17.4 %	9.4 %
Capital conservation buffer				9.4 %
Tier 1 leverage ratio	4.0 %	1.0 %	5.2 %	1.2 %
Leverage buffer				1.2 %

Credit Risk

The adoption of CECL effective January 1, 2023 provided substantial revisions to GAAP, including the removal of the concept of impaired loans. GAAP now requires specific disclosures related to nonaccrual and loans past due greater than 90 days. Refer to Note 2 of the accompanying Financial Statements for accounting policy updates as a result of the adoption of CECL.

Refer to Note 2 of the accompanying Financial Statements for amounts of nonaccrual loans without related allowance, loans in nonaccrual status and greater than 90 days past due, loans past due greater than 90 days and still accruing, the allowance at the end of each reporting period, charge-offs during the period, and changes in components of our allowance for credit losses. The allowance for credit losses is determined individually or by a pooled approach for loans that share similar risk characteristics, including, but not limited to, probability of default (PD) and loss given default (LGD). Allowance needs by geographic region are only considered in rare circumstances, for example flooding, drought, etc., that may not otherwise be reflected in the PD and LGD. There was no allowance attributed to a geographic area as of June 30, 2023. Refer to Note 3 of the accompanying Financial Statements for a summary of the contractual maturity, amortized cost, fair value and weighted average yield of investment securities by type. All nonaccrual loans, past-due loans and allowance are within our retail portfolio. The retail portfolio is substantially concentrated in our chartered territory and has not changed significantly since December 31, 2022.

Refer to the Capital Adequacy and Capital Buffers section for information regarding types of credit risk exposures.

Credit Exposures - Lending and Investments

(in thousands)	End of Period	3-month Average Daily Balance
As of June 30, 2023		
Loans	\$138,027,566	\$135,803,302

Retail Portfolio	
Crops	55 %
Cattle	10 %
Loans to OFIs	9 %
Other	26 %
Total	100 %

Counterparty Credit Risk and Credit Risk Mitigation

Credit Risk Mitigation Related to Derivatives

Refer to the Derivative Financial Instruments section in the Management's Discussion and Analysis and Note 8 of the accompanying Financial Statements for more information on credit risk mitigation related to derivatives.

We have not entered into any credit default swap agreements to mitigate our credit exposure to counterparties. Refer to Note 8 of the accompanying Financial Statements for the gross positive fair value of contracts, collateral held and the net unsecured credit exposure. The derivative portfolio is not covered by guarantees.

Current credit exposure is the greater of \$0 or the fair market value of a single derivative contract. The net current credit exposure is the greater of the net sum of all positive and negative fair market value of the individual derivative contracts subject to the qualifying master netting agreement or \$0. The net current credit exposure is equal to the gross positive fair values as disclosed in Credit Exposures - Derivatives table above.

Credit Risk Mitigation Related to Loans

Financial collateral is not used to mitigate credit risk in our loan portfolio.

Loan and Commitment Exposures Covered by Guarantees

(in thousands)	3-month Average Daily Balance	Risk-weighted 3- month Average Daily Balance
As of June 30, 2023		
Unconditionally guaranteed		
Loans	\$173	\$—
Conditionally guaranteed		
Loans	20,356	4,071
Commitments	6	—
Total	\$20,535	\$4,071

Credit Risk Mitigation Related to Investments

Financial collateral is not used to mitigate credit risk in our investment portfolio.

Investment Exposures Covered by Guarantees

(in thousands)	3-month Average Daily Balance	Risk-weighted 3- month Average Daily Balance
As of June 30, 2023		
Unconditionally guaranteed	\$12,742,874	\$—
Conditionally guaranteed	1,520,639	304,128
Total	\$14,263,513	\$304,128

Credit risk in our investment portfolio is largely mitigated by investing primarily in securities issued or guaranteed by the U.S. government or one of its agencies. Credit risk in our investment portfolio primarily exists in investment securities that are not guaranteed by the U.S. government or one of its agencies, which include our certificates of deposit, commercial paper, non-agency mortgage-backed securities and asset-backed securities, all of which were of high credit quality and met eligibility requirements as of June 30, 2023.

Securitization

For the three months ended June 30, 2023, we did not hold any off-balance sheet securitization exposures, retain any resecuritization exposures, nor were any securitization exposures deducted from capital.

Securitization Exposures

(3-month average daily balance in thousands)		Weighted average risk-	Risk-weighted
As of June 30, 2023	Exposure	weight factor	assets
Gross up risk weight bands:			
100%	\$14,425	100%	\$14,425
> 100% and < 1,250%	118,762	182%	216,149
1250%	—	1250%	—
Total risk-weighted securitization assets	<u>\$133,187</u>	<u>173%</u>	<u>\$230,574</u>

Equities

We are a limited partner in certain Rural Business Investment Companies (RBICs) for various relationship and strategic reasons. These are not publicly traded, and the book value approximates fair value. There have been no sales or liquidations of these investments during the period. As of June 30, 2023, all RBICs were accounted for under the equity method; therefore, no unrealized gains (losses) exist for the exposure. Further, we do not believe any significant latent revaluation gains (losses) exist for these exposures. No RBIC exposures are included in tier 1 or tier 2 capital.

Equity Investments included in Capital Ratios

(in thousands)	Disclosed in Other	Life-to-Date losses
As of June 30, 2023	Assets	recognized in Retained Earnings ⁽¹⁾
RBIC	\$26,871	\$4,725

⁽¹⁾ Retained earnings is included in common equity tier 1, tier 1 and total capital ratios

Interest Rate Risk

Our policies establish a maximum variance from our base case in a plus or minus 200 basis point change in rates, except when the U.S. Treasury three-month rate is below 4 percent, at which time the minus scenario is limited to one-half of the U.S. Treasury three-month rate. Due to interest rate levels as of June 30, 2023, the down scenario was not limited.

NII Sensitivity Analysis

As of June 30, 2023	Basis Point Interest Rate Change			
	Down 200	Down 100	Up 100	Up 200
Immediate Change (Shock):				
NII sensitivity	(4.1)%	(1.6)%	0.1 %	(0.8)%
Board policy	(15.0)%			(15.0)%
Gradual Change (Ramp):				
NII sensitivity			0.5 %	0.5 %

Economic Value of Equity (EVE) Sensitivity Analysis

As of June 30, 2023	Basis Point Interest Rate Change			
	Down 200	Down 100	Up 100	Up 200
Immediate Change (Shock):				
EVE sensitivity	8.3 %	3.3 %	(2.8)%	(5.4)%
Board policy	(12.0)%			(12.0)%
